2015/5584/P	David Money	21 Claylands Place London SW8 1NL	05/11/2015 18:47:51 INT		We are the architects for the application. In response to the concerns raised I would stress that no changes in the building use, refuse arrangements or air conditioning are being proposed, so the potential for noise and disruption will not change. The enlarged rooflight on the Rosebery Avenue entrance may create a small amount of light pollution in the hours of darkness, when presumably curtains or blinds of the residential units will be drawn. These proposals represent a modest and sensitive improvement of a dilapidated structure of benefit to local employment and the character of the area.
