Dear Anna  
A few weeks ago one of your surveyors came and measured my back windows, he informed me that he did not need to measure the front windows as they were not going to be replaced.  
I'm extremely worried about this as these front windows let in a lot of noise, Mansfield RD is a very busy road and has a bus route travelling up and down it. The windows let in a lot of draught and in the winter you can hear the wind whistling through them.  
My final concern is that I'm unable to find suitable window locks to secure these stable door windows so that my home protection complies with <sup>my</sup> home insurance policy.  
I hope you reconsider and replace all of my windows  
Kind Regards  
Jennifer Biggs
