2015/5848/P	Dylan and Claire Wood	Flat A 12 Bisham Gardens London N6 6DD	11/11/2015 11:03:49	COMMNT	It is our understanding that there have been serious structural issues with this flat in the past - circa 1994/1995. We understand that a load bearing internal wall was removed without the necessary structural work being carried out, causing huge problems and the threatened collapse of the building. At this point Camden Council were brought in to intervene, and a steel was put in place. Clearly our concern is with the on-going integrity of the building, and we would like to see a qualified structural surveyor appointed, and a satisfactory structural survey, prior to any permissions being granted and work being carried out.
