2014/7274/P	Massimiliano Sale	10 St Georges Terrace NW18XH NW18XH	23/11/2015 21:30:50	OBJ	<p>Having studied the plans, I feel I must strongly express my objection to this project altogether.</p> <p>The reasons for my objection are:</p> <ol style="list-style-type: none">1. Altering the original feature and structure of the terrace The extension in question will compromise the structure and the harmony of the building, which has been preserved so far (being a listed building). As freeholder of listed building we make a huge personal and financial sacrifice to maintain the beauty and the integrity of the houses of the terrace and I feel that allowing any modifications will frustrate all the efforts done so far2. Creating a precedent: I fear that approval of such a development in our neighbourhood will create a precedent allowing all the other houses to transform the gardens into extensions, reducing the green areas with a dramatic impact on the aspect of the area and on the views from the windows at the rear.3. Risk of foundation movement Given the slope where the terrace is built, I am concerned tat the excavation could cause instability in the ground and in the foundation with potential damage to all the listed houses in the terrace.
