2015/3525/P	Richard Livesey-Haworth	8 Holly Place Holly Walk London: NW3 6QU	18/11/2015 10:40:26	OBJNOT	I believe this is yet another inappropriate basement development plan & register my objection. Frognal Rise is, with University College Junior School in Holly Hill, one of the busiest roads in Hampstead & these works will cause chaos. There is a known well only 50m away and recent problems with the water main in Windmill Hill suggest that, despite the 80+ page basement impact report, such works will cause further problems. Please would you uphold the spirit of your draft Planning Guidelines & the spirit of the draft Neighbourhood Plan and reject this application?
2015/3525/P	M Green	Heath Drive	17/11/2015 14:42:35	OBJEMPER	Object to proposed extended second basement level, due to waterflow indicated in bagshot clay noted on geological survey produced. the impact of water flow at this high level on frognal will cause further flooding to Allotments at branch hill and further down Frognal, which has already a very high water table.
