

Lower Ground Floor Courtyard (Private)

North facing courtyards within the development can be designed with shade tolerant species reaching up through the heart of the building, filtering views between units whilst offering a connection to the adjacent Lymington Road gardens.

6.4 CHARACTER AREAS

Vehicle Entrance

Vehicular circulation may be to the north of the site, directed away from pedestrian areas making a safe enjoyable environment for all.

Shared Access

A shared access allows for pedestrian and vehicular circulation in a Home Zone fashion, creating a welcoming, safe environment.

Roof Terrace

There are also opportunities to explore, using tall shrubs on the terraces as they step back, softening the building as well as filtering views between units and Lymington Road properties.

Defensible Space

Each unit will have its own private front garden, transitioning from private to more public areas.

Overall this site will be an inviting development with a variety of landscape areas for the benefit of residents and passersby.

Existing site - unattractive design and poor pedestrian environment

Proposed - welcoming, pedestrian priority, safer more attractive path, active frontages, new trees

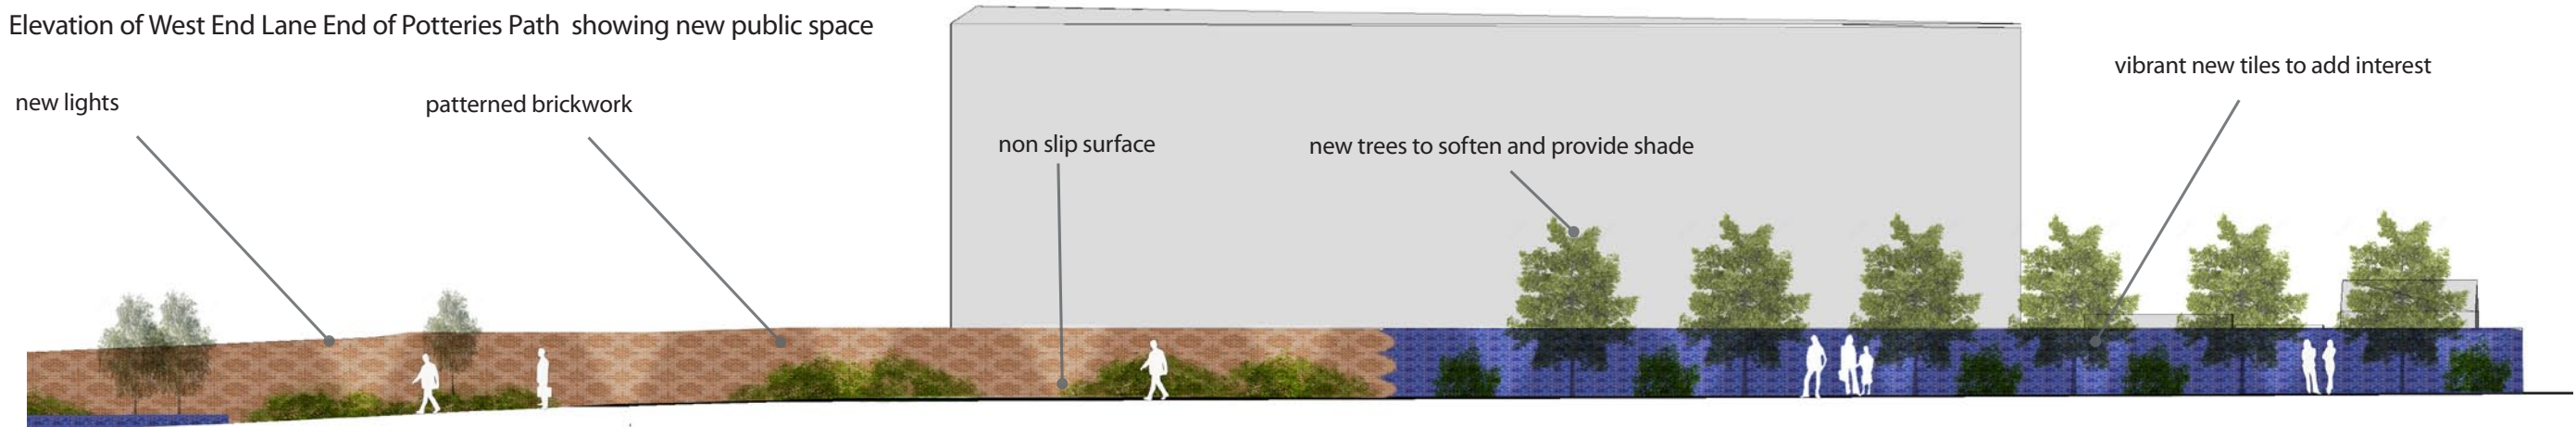

Public Right of Way

We understand that the community would like to see improvements to Potteries Path and this project provides the opportunity to create a journey where there are spaces to meet, greet, relax or pass through a much more welcoming place .

Pedestrian Entry and Start-Up Spillout Space

The pedestrianised entrance off West End lane provides the opportunity for new trees and spill out space for the start up units and the possibility of an informal seating area.
