Release Points

Release points for the above mentioned odors are listed below.

- ***Via a commercial filtered extractor system/canopy located above the cooking area, which will filter any odor, extract and release at roof/chimney level through ducting running up rear exterior wall.***

Sensitive Receptors/Affected Area(s)

No surrounding area of influence will be affected.

Control

All products and materials are to be delivered fresh and inspected everyday then stored in controlled environments, which will minimize, if not, exclude any odor. Any excess products and material will be stored in designated waste controlled storage and disposed of at the end of every business/working day. In addition to the above, all staff will be compliant in odor management and regular training/knowledge updating provided to remain compliant and minimize odor. Odor monitoring logs will also be kept and updated daily/weekly.
