Planning application number... 2015/5748/P .....

Planning application address... 87B QUEENS CRESCENT NW5 4EU .....

I support the application (please state reasons below)

I object to the application (please state reasons below)

Your comments I don't want to formally oppose the application, but want to ensure that my home will not be damaged and that due consideration is given to my health.

- ① I would like to have the impact of the new extension surveyed to ensure that it will not place undue strain on the structure of my flat (basement + upperground floors).
- ② I would also like to know the length of time that I will have to endure scaffolding while the work is being done as this poses a security risk. I suffer with a lung disease (for which I receive pulmonary rehabilitation and daily medication), so I would like assurances about means for limiting dust while the work is being done. I would also like to ensure the building detritus is removed ~~at~~ on completion of the work.
