2015/5435/P	Andrew Darwin	Flat 1 55-57 Holmes Road NW5 3AN	30/11/2015 13:14:39	APP	It is not clear what is meant by changes are to extend the lower basement level to relocate part of the warehouse (B8) use from the mezzanine floor". Does this mean that there will now be a 2 levels of basement to be excavated? I thought this was rejected previously? Increasing the size of the building has already been rejected previously and this seems to be another request to increase the size of the building yet again. The impact of excavating 2 basement levels in a high density residential area, and directly opposite a school, is too great and will blight the lives of so many living in direct proximity of the building. The redevelopment of the site is already encroaching on the lives of many residents and children at the school. No benefits to the local community have been identified that support this change.
2015/5435/P	S Mcneill	55 57 holmes road	02/12/2015 12:44:34	COMMNT	Why are you not contacting residents re this application. Not everyone gets the Residents Association emails so how can we object. There has been too much buidling work in this area for the past few years. The noise and mess can be unbearable. Please ask yourselves if this building or the changes are necessary and in the interest of the road, residents nearby and the rest of the community
