2015/5822/P	Dee Rissik	Flat 5 5 Hanway Place London W1T 1HF	29/11/2015 17:31:22	OBJEMPER	<p>Dear Application Manager'</p> <p>Re: objection to application number: 2015/5822/P.</p> <p>I object very strongly to this application.</p> <p>Our flat is directly behind(south) of 1 Stephen Street on the 4th floor with our balcony and bedroom doors facing this roof.</p> <p>The recent refurbishment/upgrade of the building has already led to an extensive increase in the noise pollution and air pollution from the enhanced (or extended?) aircon outlets that are now operating continuously on that roof. It is substantially worse than it was before the renovation of the building began. Thus a further five aircon units would make this situation even worse from both a health and a noise perspective.</p> <p>Thus I would like to object in the strongest possible terms to this application and hope you will put the health and safety needs of your constituents, not just me, but everyone living in the area, ahead of this commercial application.</p> <p>Yours sincerely, Dee Rissik</p>
2015/5822/P	David Netherway	Flat 5 5 Hanway Place	30/11/2015 07:39:31	OBJ	<p>I would like to object very strongly to this application.</p> <p>Our flat is directly behind(south) of 1 Stephen Street on the 4th floor with our balcony and bedroom doors facing this roof.</p> <p>The recent refurbishment/upgrade has already led to an extensive increase in the noise pollution and air pollution from the enhanced (or extended?) aircon outlets that are now operating continuously on that roof. Its bad enough now with the noise from the rubbish trucks in Stephen St very early in the mornings. To have air-con units running night and day is really not on.</p> <p>Yours sincerely</p>

2015/5822/P	Ian Morgan	Flat Eight 10 Windmill Street W1T 2JE	30/11/2015 18:16:57	OBJEMPER	<p>I wish to object to this application. This is the latest addition of plant and machinery to this building. I am very concerned that the level of noise and therefore nuisance emanating from the development at 1 & 2 Stephen Street has increased significantly over the last 18 months.</p> <p>Our flat is on the fourth floor on the south side of Windmill Street and face towards this property. The noise from it has now reached the level of creating a nuisance and we have reported this to the Council. We have lived in this location for over 20 years and are used to the noise from a/c units and extractors but the general level is now significantly higher and this development seems to be the source of the additional noise.</p> <p>When enforcement proceedings were taken against 8 Charlotte Street the level of background noise affecting our flat was measured. I consider that a similar survey now needs to be undertaken to measure the increase in the noise level. As a result of the additional machinery installed in the Stephen Street Development.</p> <p>With regard to this application the level of noise generated needs to be measured against the level in 2013/13 not the level now.</p> <p>I am increasingly concerned that each application that is allowed increases the level of background noise and that this is definitely on the rise. I consider that the Council should establish a level and I would suggest that for Windmill Street/Percy Street and Charlotte Street this should be the level established for the enforcement proceedings for 8 Charlotte Street. Then any applications that affect these streets including the noise emanating from Stephen Street should be measured against this and applications refused if the noise is not within the Councils defined limits.</p> <p>It is far better that these issues are addressed at the application stage rather than have to be enforced later.</p> <p>I look forward to hearing from you on this matter.</p> <p>Regards</p> <p>Ian Morgan</p>
