Importance: High

Dear Mr Remmington

We have been informed by No.22 that the tree will be felled on 21st December due to the fact that it is a dying tree?

This is categorically not correct. There is nothing dying in this tree as during the spring and summer months for as long as we have lived at 24B the tree has blossomed hugely creating great shade against the sun's rays.

We have photos that can clearly demonstrate this.

If anyone were to come and look at the tree it is quite clear the tree is not dying.

We would like to know why this perfectly healthy tree is being felled? If not we will have no other option but to take legal advice and instruct a tree surgeon / expert to come and declare it healthy.

In a conservation area which is already over urbanised, this is an unacceptable situation to be freely chopping down tree after tree.

Please could someone reply to my email as a matter of importance.

Regards

Leila Hudson & Nick Jones

Dear Mr Remmington

We have received a letter dated 11 November but only got it today? Our post often gets put into the wrong boxes at 24 Lymington Road. Hence we are writing this email immediately and also copying in Mr Sexton and Mr O'Donnell as we have had correspondence with them recently. This is the second time we have received a letter late.

We are writing to you with regard to the planning application that has been made at 22 Lymington Road, the felling of one Sycamore Tree.

We are writing to object to this on numerous grounds:

- * One tree has already been felled at No. 22 due to the fact that it was diseased (apparently)
- * The sycamore tree is not diseased in any way. On the contrary, this tree is very healthy and very important to the area
- * This is in a conservation area and hence we are flabbergasted that the council will permit this tree to be felled in the light of the legislation with regard to felling trees within conservation areas
- * In light of the fact that there is a planning application for a huge development at 156 West End Lane why would the felling of this very healthy tree be permitted in what is already a very urban area?
- * There is so much research showing how important urban trees are, not just for wildlife, but because of their crucial role they play in reducing urban air pollution and the role in shading which is important with climate change
- * No. 22 Lymington road are also opposing the development of 156 West End Lane and one of the key reasons is that its being done within a conservation area. This seems particularly odd that on the one hand to object to a building development due to reasons that include building within a conservation area yet happy to get a tree felled within the same conservation area and a tree that is perfectly healthy

We do hope that you will consider our comments seriously and we hope that we can save a tree in this instance

Please can you acknowledge receipt of this email.

Thank you

Regards
