Forward Planning
London Borough of Camden
Town Hall Extension
Argyle Street
London WC1H 8EQ

Published November 2010.

Camden's Local Development Framework. Core Strategy 2010.

Section 1

Location and management of Camden's growth

- 1.1 Camden is growing and changing. It is estimated that our population will increase by around 36,000 people (about 18% of total population) between 2006 and 2026, while London will grow by over a million people over the same period (15%). Future growth in Camden will be largely due to there being more births than deaths in the borough, although in-migration will also be a factor. In addition, our population is growing older with increases in the proportion of working age people over 45 and those of pensionable age between 60/65 and 74. (GLA Round 2006 Demographic Projections).
- 1.2 The forecast growth in population will be accompanied by an increase in the number of homes, offices and other land uses. The Mayor of London's London Plan contains a target of 5,950 additional homes in Camden from 2007/8 to 2016/17, which we are expected to exceed (see paragraph 1.7). National planning policy also promotes increasing the supply of homes. The Core Strategy must be consistent with national policies and in general conformity with the London Plan.
- 1.3 *A sustainable Camden that adapts to a growing population* is one of the four themes within the vision of *Camden Together*, Camden's Community Strategy. The Community Strategy says that we will find ways to adapt to Camden's growing population while protecting, promoting and enhancing our environment for us and for future generations. The Core Strategy is one of the main mechanisms for achieving this aim.
- 1.4 This section sets out the Council's overall spatial strategy for the borough. It explains where Camden's future growth and development will be focussed, gives more detail on our approach to growth areas, other highly accessible areas and areas which will experience more limited change. It also sets out our overarching approach, further developed in sections 2 and 3, to managing growth in a way that provides necessary homes, jobs and facilities and protects and improves Camden's environment, heritage and quality of life.

CS1. Distribution of growth

- 1.5 Many parts of the country are facing the challenge of where and how to accommodate a growing and changing population and the facilities and infrastructure needed to support it. Camden's character – as an already highly built up, inner London area, with limited land available for development, many established residential areas, often mixed with other uses, and many places of heritage, environmental and community value – mean that we face particular challenges in adapting to our growing population while improving and protecting our environment and quality of life. Policy CS1 sets out our overarching approach to the location of future growth and development in the borough.

CS POLICY

CS1 – Distribution of growth

Overall approach to growth and development:

The Council will focus Camden's growth in the most suitable locations, and manage it to make sure that we deliver its opportunities and benefits and achieve sustainable development, while continuing to preserve and enhance the features that make Camden such an attractive place to live, work and visit.

We will promote:

- a) a concentration of development in the growth areas of King's Cross, Euston, Tottenham Court Road, Holborn and West Hampstead Interchange;
- b) appropriate development at other highly accessible locations, in particular Central London and the town centres of Camden Town, Finchley Road / Swiss Cottage, Kentish Town, Kilburn High Road and West Hampstead; and
- c) more limited change elsewhere.

Following this approach, the Council expects that in the order of 12,250 additional homes will be provided in Camden between 2010/11 and 2024/25. We will identify, and provide guidance on, the main development opportunity sites in the borough through our Camden Site Allocations Local Development Framework document.

Making the best use of Camden's limited land

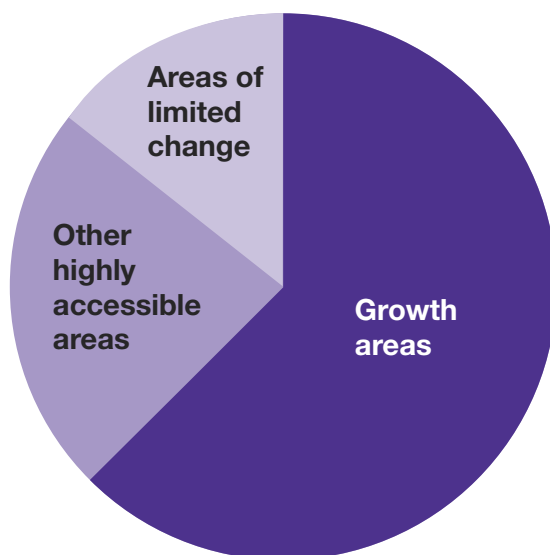

The Council will promote the most efficient use of land and buildings in Camden by:

- d) seeking development that makes full use of its site, taking into account quality of design, its surroundings, sustainability, amenity, heritage, transport accessibility and any other considerations relevant to the site;
- e) resisting development that makes inefficient use of Camden's limited land;
- f) expecting development that will significantly increase the demand of travel to be located in growth areas and other highly accessible parts of the borough;
- g) expecting high density development in Central London, town centres and other locations well served by public transport; and
- h) expecting the provision of a mix of uses in suitable schemes, in particular in the most accessible parts of the borough, including an element of housing where possible.

Overall approach to growth and development

- 1.6 The Council's overall strategy for managing future growth in Camden is to promote the provision of homes, jobs and other facilities in areas with significant redevelopment opportunities at, or near, transport hubs, and support appropriate development at other accessible locations, with more limited change elsewhere. This approach will:
- focus growth on places that can support higher density development, reducing pressure for substantial development in predominantly residential areas (although some development will take place throughout the borough);
 - allow us to better 'shape' places by promoting high quality design of buildings and places, securing necessary infrastructure, providing an appropriate mix of uses, including community facilities, and securing regeneration benefits; and
 - through promoting larger schemes increase our ability to provide more sustainable places, for example by maximising opportunities for local power and heating.
- 1.7 We expect our strategy to provide approximately 12,250 additional homes (including 9,850 new self-contained homes) between 2010/11 and 2024/25. This provision is expected to include around 7,250 homes from sites of 10 homes or more. The diagram below shows how these homes will be distributed around the borough. Just over 60% will be on sites in the growth areas, just over 20% will be in other highly accessible areas, and around 15% will be in areas of more limited change. In addition c2,600 homes will be provided from smaller sites and c2,400 from non-self contained dwellings and vacancies being returned into use. On the basis of past trends, we expect these homes to follow broadly the same distribution around the borough. This gives a total of around 815 homes per year between 2010/11-2024/25, which comfortably exceeds Camden's current London Plan target of 595 homes per year between 2007 and 2017. This means that we can meet our housing targets even if some identified sites do not come forward for development as envisaged.

Distribution of new homes by area 2010-2025 (based on identified sites for 10 or more homes)

- 1.8 Housing will be considered the priority land use of this Core Strategy and the Council's other Local Development Framework documents. Please see *policy CS6 – Providing quality homes* for our detailed approach to housing, and paragraphs 6.8 to 6.18 for more detailed information on our housing targets and the type of housing that will be provided.

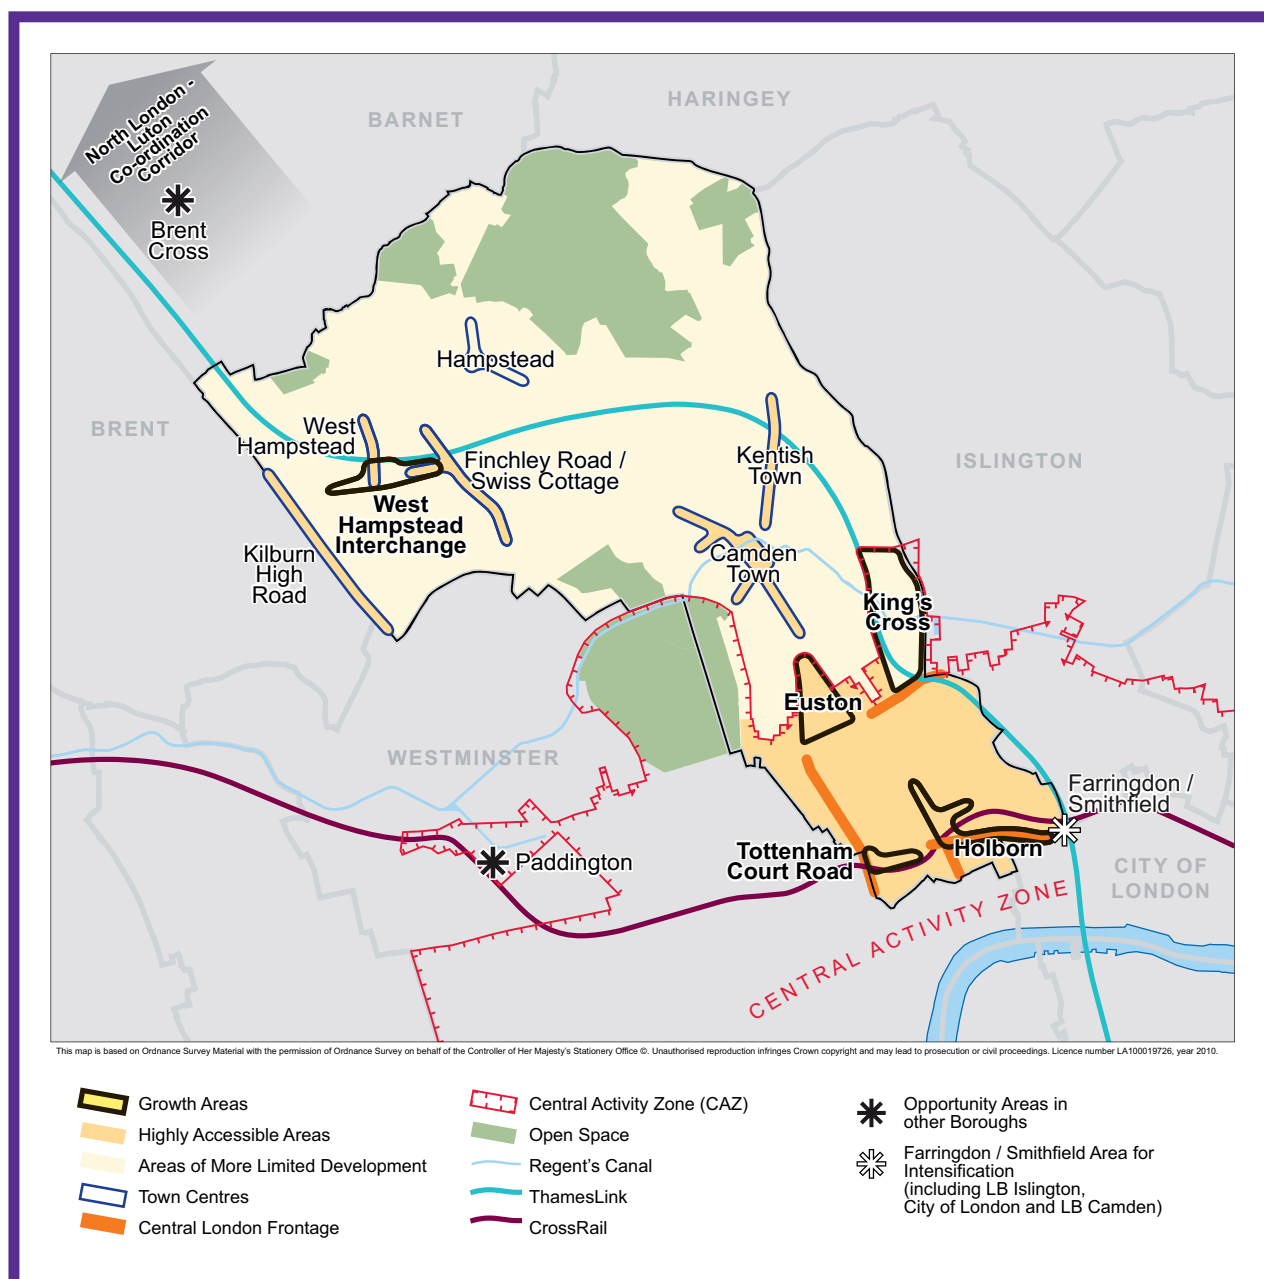

- 1.9 The Council's overall spatial strategy is illustrated on Map 1 – Key Diagram. This shows the broad location of Camden's growth areas, other highly accessible locations / town centres, major transport schemes and the borough's main open spaces.
- 1.10 A key part of our strategy is to ensure that our growing population is supported by necessary infrastructure and services. The Camden Infrastructure Study 2009, commissioned by the Council, identified the borough's infrastructure needs over the fifteen year period covered by this Core Strategy, taking into account expected growth. This forms the basis of Appendix 1 which sets out key infrastructure programmes and projects needed to deliver the Core Strategy. Section 4 sets out more detail on our approach to the provision of infrastructure. Developments will be expected to make appropriate contributions towards the infrastructure needs they generate.

Growth areas

- 1.11 King's Cross, Euston, Tottenham Court Road, Holborn and West Hampstead Interchange will be the locations for the largest amount of Camden's future growth. These areas are identified in the London Plan as suitable for large scale redevelopment or significant increases in jobs and homes, and are based around transport interchanges where increased capacity is planned. The majority of these areas are within Central London and therefore their redevelopment will contribute towards the continued success of Central London and to London's national and international role, as well as providing opportunities to bring benefits to the borough and the local area. Please see policy CS9 – *Achieving a successful Central London* for our overall approach to Central London.
- 1.12 King's Cross will be the focus of the most growth in Camden up to 2025, with large-scale redevelopment transforming the area and creating a new quarter for Camden and London. Redevelopment at Euston and around Tottenham Court Road will also provide substantial numbers of jobs and homes, as well as other uses and facilities. Development at West Hampstead Interchange is expected to be predominantly housing. Policy CS2 – *Growth areas* gives more detail on our approach to Camden's main growth areas. The boundaries of the growth areas are shown on Maps 11-15 in Appendix 6.
- 1.13 King's Cross, Euston and Tottenham Court Road (part in Westminster) are included in the London Plan as Opportunity Areas, that is, places able to accommodate substantial new jobs and homes, in association with public transport improvements. Holborn, West Hampstead Interchange and Farringdon/Smithfield (much of which lies in the City of London and Islington) are designated as Areas for Intensification, places with significant potential for redevelopment for housing, employment and other uses, although at a scale less than that for Opportunity Areas, again in association with public transport improvements.
- 1.14 Known development sites in the growth areas and at other locations throughout the borough, and the Council's expectations for them, are identified in the *Camden Site Allocations* document, which also forms part of our Local Development Framework.

Map 1: Key Diagram

Other highly accessible locations

- 1.15 Beyond the growth areas there are a number of other parts of the borough which are considered suitable locations for significant development as they are highly accessible by a range of means of transport. These highly accessible areas are the Central London area outside of the growth areas, and the town centres of Camden Town, Finchley Road/Swiss Cottage, Kilburn High Road, Kentish Town and West Hampstead. These areas are considered to be particularly suitable locations for uses that are likely to lead to a significant increase in travel demand (for example, retail, offices, leisure and tourism), although the scale of development at these locations is expected to be less than that in the growth areas. Public transport accessibility to Hampstead is not considered to be sufficient for it to be a suitable location for uses that generate significant travel demand.
- 1.16 Policy CS3 gives more detail on our approach to Camden's other highly accessible locations. Policy CS9 sets out our overarching approach to Central London, with its unique character and challenges, where we seek to achieve a balance between its important contribution to London and the UK and local communities and facilities. Policy CS7 sets out our approach to Camden's town centres.

- 1.17 We will expect activities that are that are likely to lead to a significant increase in travel demand to be located in these parts of the borough or the growth areas. The Council will require applicants to demonstrate that all potential options for development in these areas have been thoroughly assessed before edge-of-centre and, finally, sites outside these areas are considered for development, taking into account their accessibility by a choice of means of transport; their likely effect on travel patterns and car use. This approach will help to reduce the need for car journeys, help promote walking, cycling and public transport and allow a single journey to serve more than one purpose. For more information on the level of development we consider creates significant travel demand please see Appendix 1 in Camden Development Policies.

Areas of more limited change

- 1.18 Other parts of the borough are generally expected to experience more limited development and change than will occur in the growth areas and other highly accessible locations. The scale of this will vary, from areas adjacent to growth areas, such as Somers Town, where the Council will seek to spread the redevelopment benefits of nearby schemes, to predominantly residential areas, where smaller scale and more incremental change is expected take place. Policy CS4 gives more detail on these areas and the Council's approach to them.

Managing growth

- 1.19 Central to the Council's overall approach to adapting to Camden's growing population is managing future growth to make sure that it is sustainable, that it provides opportunity and benefits to the borough and its local area, and that it protects and enhances our environment, heritage and quality of life.
- 1.20 Our overall approach to managing the impact of growth is set out in policy CS5, while more detail on aspects of our approach to managing growth is given in many other policies in this Core Strategy, particularly those in section 3 – *A sustainable and attractive Camden*, for example policy CS13 on tackling climate change and CS14 on promoting high quality places and conserving our heritage. Camden Development Policies contains detailed planning policies to support our strategy of managing growth, for example on high quality design (DP24), sustainable design and construction (DP22), and the impact of development on occupiers and neighbours (DP26).

Making the best use of Camden's limited land

- 1.21 If we are going to adapt successfully to Camden's growing population, we need to make the best use of the borough's limited land. The Council will promote the most efficient use of Camden's land and buildings while also seeking to improve the quality of our environment, protect the amenity of occupiers and neighbours and meet its other planning objectives.

Density

- 1.22 One way of making the most efficient use of our land and buildings is to encourage higher densities (that is, have more buildings or rooms in a given area). The Council wants to encourage developments with high densities in the most accessible parts of the borough (generally, Central London and the town centres of Camden Town, Finchley Road/Swiss Cottage, Kilburn High Road, Kentish Town and West Hampstead) and other appropriate locations. Such schemes should be of excellent design quality and sensitively consider the amenity of occupiers and neighbours and the character and built form of their surroundings, particularly in conservation areas. Good design can increase density while protecting and enhancing the character of an area. (Please see policy CS14 and Development Policies DP24 and D25 for more detail on our approach to design.)
- 1.23 The Council will expect the density of housing development to take account of the density matrix in the London Plan (Table 3A.2). As Camden is generally well served by public transport, the Council will expect densities towards the higher end of the appropriate density range in the matrix unless it can be demonstrated that the specific circumstances of a development mean this is not appropriate. Densities below the relevant range in the density matrix will not be permitted. In addition, development schemes with a density below that of the surrounding area will normally be resisted. Please also see paragraphs 2.9 to 2.10 in Camden Development Policies for more on our approach to density.

Mixed use developments

- 1.24 The provision of an appropriate mix of uses, both within areas and in individual buildings, can also contribute to successfully managing future growth in Camden and making efficient use of its limited land. A mix of uses can also:
- reduce commuting and the need for some other journeys, helping to cut congestion in the borough and improve air quality;
 - increase the provision of much-needed housing;
 - promote successful places that have a range of activities and are used throughout the day, increasing safety and security.
- 1.25 The Council will encourage the provision of a mix of uses in suitable locations and expect development proposals of an appropriate size in Central London and the town centres of Camden Town, Swiss Cottage and Kilburn High Road to contribute towards the supply of housing. This reflects the designation of housing as the priority land use of the Core Strategy (see policy CS6). Camden Development Policies policy DP1 contains further detail on the Council's approach to mixed use development. The Council's Site Allocations document will identify future development sites and provide guidance for their future development, including where mixed use development is appropriate.

CS5. Managing the impact of growth and development

- 5.1 The overall approach of the Core Strategy, as set out in policy CS1, is to manage Camden's growth to make sure that its opportunities and benefits are delivered and sustainable development is achieved, while continuing to conserve and enhance the features that make Camden such an attractive place to live, work and visit. This flows from the Camden Community Strategy theme of a sustainable Camden that adapts to a growing population. Policy CS5 provides more information on our approach to managing the impact of growth in the borough.

CS POLICY

CS5 – Managing the impact of growth and development

The Council will manage the impact of growth and development in Camden. We will ensure that development meets the full range of objectives of the Core Strategy and other Local Development Framework documents, with particular consideration given to:

- a) providing uses that meet the needs of Camden's population and contribute to the borough's London-wide role;
- b) providing the infrastructure and facilities needed to support Camden's population and those who work in and visit the borough;
- c) providing sustainable buildings and spaces of the highest quality; and
- d) protecting and enhancing our environment and heritage and the amenity and quality of life of local communities.

The Council will protect the amenity of Camden's residents and those working in and visiting the borough by:

- e) making sure that the impact of developments on their occupiers and neighbours is fully considered;
- f) seeking to ensure development contributes towards strong and successful communities by balancing the needs of development with the needs and characteristics of local areas and communities; and
- f) requiring mitigation measures where necessary.

Making sure development achieves the objectives of the Core Strategy

- 5.2 Central to managing Camden's future growth is the need to consider not just the scale and nature of that growth, but how it is provided and the effect on those who live in the area and the borough as a whole. All development in Camden, large or small, whether located in growth areas, highly accessible locations or in other parts of the borough, should take place in accordance with all relevant policies in the Core Strategy and the other documents that form part of Camden's Local Development Framework (see paragraph 4 in the Introduction) to ensure that the Council's vision for the borough is achieved. The Council will seek to ensure that the borough's growth brings benefits and opportunities to all.
- 5.3 The second section of this Core Strategy, *Meeting Camden's needs – Providing homes, jobs and facilities*, sets out our approach to providing the land uses, infrastructure and facilities that are needed to support Camden's communities, workers and visitors. This includes places to live, work and shop, community facilities and provision for walking, cycling and public transport. The section also sets out our approach to the unique issues faced in Central London, the home to many of the uses that contribute to London's role as a capital and major international city, as well as long-established residential communities.

- 5.4 One of the key elements of managing Camden's growth is securing the infrastructure and services needed to support Camden's growing numbers of residents, workers and visitors. To identify the infrastructure need in the borough in future years we commissioned the Camden Infrastructure Study 2009. This work formed the basis of the schedule in Appendix 1, which set out identified key infrastructure programmes and projects including transport, utilities, emergency services, education, health and other community facilities. It gives information on the nature of each infrastructure scheme, where it will be located, who will lead on its delivery and when it is expected to be provided. As the boundaries of the growth area are relatively tightly drawn, taking in the main development opportunities, the infrastructure to support a particular growth area may be provided outside its boundary. Please see section 19 – *Delivering and monitoring the Core Strategy* for more detail on our approach to infrastructure provision. In addition, the individual sections in the Core Strategy also contain details of infrastructure requirements and provision that are relevant to that section (for example, policy CS15 on open space and policy CS11 on transport.)
- 5.5 The third section of the Core Strategy, *A sustainable and attractive Camden – Tackling climate change and improving and protecting Camden's environment and quality of life*, focuses on making sure that growth is sustainable and properly takes into account the character of Camden and the aspects of the borough that make it such an attractive place to live, work and visit. It sets out how we intend to make Camden a low carbon, low waste borough; deal with climate change; and protect, and where possible enhance, our built environment, heritage and open spaces. It also sets out our approach to improving the safety and health of the community.
- 5.6 Our Camden Development Policies Local Development Framework document will be one of the main mechanisms by which we will seek to deliver to vision and objectives in the Core Strategy. It sets out planning policies that provide more detail of our approach to many of the matters covered in this Core Strategy. We will use Camden Development Policies alongside the Core Strategy when we determine applications for planning permission.

Protecting amenity

- 5.7 Camden's high level of amenity – the features of a place that contribute to its attractiveness and comfort – is a major factor in the quality of life of the borough's residents, workers and visitors and fundamental to Camden's attractiveness and success. However, Camden's inner London location, the close proximity of various uses and the presence of major roads and railways can mean that privacy, noise and light can be particular issues in the borough.
- 5.8 Protecting amenity is, therefore, a key part of successfully managing growth in Camden. We will expect development to avoid harmful effects on the amenity of existing and future occupiers and nearby properties or, where this is not possible, to take appropriate measures to minimise potential negative impacts. More detail and guidance on our approach to amenity is contained in Camden Development Policies policy DP26 – and our Camden Planning Guidance supplementary document. Other policies in Camden Development Policies also contribute to protecting amenity in the borough by setting out our detailed approach to specific issues, such as the impact of food, drink and entertainment uses (policy DP12), noise and vibration (policy DP28) and air quality (policy DP32)

Promoting successful communities

- 5.9 A key element to our overall strategy of managing Camden's future growth is to ensure that the opportunities and benefits of this growth are delivered in a way that meets the needs of Camden's residents and promotes strong and successful communities. In assessing development proposals, the Council will take into account the needs and benefits of the development alongside the individual characteristics and needs of the local area and community, and will seek to strike a balance between them. Where relevant, we will take into account the cumulative impacts of developments, or particular types of development, on local areas and communities.

- The London Plan (consolidated with alterations since 2004); Mayor of London; 2008

Section 2

Meeting Camden's needs

– Providing homes, jobs and facilities

- 6.1 Section 1 above sets out the Council's overall approach to the distribution and management of Camden's growth to 2025. Section 2 provides our approach to making sure we provide the homes, jobs, facilities and infrastructure needed to support the growth in the number of people living in, working in and visiting the borough. It focuses on:
- providing homes to meet housing need and targets, securing affordable homes, and encouraging mixed communities;
 - providing for new shop floorspace to meet predicted demand and promoting our town centres, including by setting out our specific objectives for each centre;
 - securing a strong economy in Camden that includes everyone;
 - supporting the unique role of Central London;
 - providing the community facilities and services needed by Camden's communities and people who work in and visit the borough;
 - ensuring the transport needed to support Camden's growth is provided and promoting more sustainable travel.

CS6. Providing quality homes

- 6.2 One of the four themes of Camden's Community Strategy is *A Sustainable Camden that adapts to a growing population*. Following from this, the Core Strategy aims to manage growth so it works positively for Camden. One element of this is securing sufficient housing of the right type and quality.
- 6.3 The Council shares the government's goal of seeking to ensure that everyone has the opportunity to live in a decent home at a price they can afford in a community where they want to live. We will therefore seek to establish a plentiful supply and a broad range of homes. However, Camden is a relatively small area within a much larger housing market, and we cannot realistically expect to meet the needs of everyone that might wish to live in the borough. This part of the Core Strategy therefore sets out:
- the overall numbers of additional homes we expect to be built in the borough;
 - the proportion of affordable housing that the Council will seek;
 - our priorities in terms of mix of sizes and types of homes that are needed for particular groups of people; and
 - the flexible implementation tools we will use to support continued delivery if economic conditions threaten the supply of homes.
- 6.4 To provide well-designed homes, proposals will need to address all the policies in the Core Strategy. In addition, Building for Life criteria set a national standard for well-designed homes and neighbourhoods. These have been prepared by a partnership of agencies led by the Commission for Architecture and the Built Environment (CABE) and the Home Builders Federation.
- 6.5 Policy CS6 relates to a number of different forms of housing which are suitable for different individuals and households. These forms of housing include:
- self-contained houses and flats (Use Class C3) (the predominant form);
 - live/ work units, which are self-contained homes that include a dedicated work area (they are outside any planning use class, but we will treat them in the same way as Use Class C3 for the operation of our Local Development Framework policies);
 - bedsit rooms that share facilities such as toilets, bathrooms and kitchens often known as houses in multiple occupation or HMOs, some with 3 to 6 occupiers fall within Use Class C4, but most are outside any planning use class);
 - hostels where shared accommodation is managed for a particular group of people (e.g. students) and occupiers may stay for several months (also outside any planning use class);
 - those nursing homes, care homes and parts of hospitals where people live permanently, such as nurses' accommodation (parts of Use Class C2); and
 - residential accommodation that is ancillary to another use, such as living areas for managers, caretakers and other staff.
- 6.6 Policy CS6 does not deal with:
- those hospitals and care facilities where patients and staff are only present on a temporary or working-hours basis;
 - hotels (Use Class C1); or
 - hostels aimed at tourists and backpackers.
- Camden's health and well-being are considered in Policy CS16, which relates in part to hospitals and care facilities. Tourism is considered in Policy CS8, which relates in part to hotels and tourist hostels.
- 6.7 Policy CS6 is concerned with the quantity of housing that is needed and the types of homes that are needed. However, a wider range of considerations feed into housing quality, including sustainability and responsiveness to climate change; the standard of design, layout and construction; integration with the surrounding area; residential amenity; contribution to the character of the neighbourhood; community safety; and the availability of local facilities and public transport. These wider considerations are dealt with in other policies throughout the Core Strategy.

CS6 – Providing quality homes

The Council will aim to make full use of Camden's capacity for housing by:

- a) maximising the supply of additional housing to meet or exceed Camden's target of 5,950 homes from 2007-2017, including 4,370 additional self-contained homes;
- b) maximising the supply of additional housing over the entire plan period to meet or exceed a target of 8,925 homes from 2010-2025, including 6,550 additional self-contained homes;
- c) supporting the supply of additional student housing, bedsits and other housing with shared facilities providing this does not prejudice the Council's ability to meet the target for the supply of additional self-contained homes, the balance of uses in the area; and the quality of residential amenity or the character of the surrounding area;
- d) minimising the net loss of existing homes;
- e) regarding housing as the priority land-use of Camden's Local Development Framework.

The Council will aim to secure high quality affordable housing available for Camden households that are unable to access market housing by:

- f) seeking to ensure that 50% of the borough-wide target for additional self-contained homes is provided as affordable housing;
- g) seeking to negotiate a contribution from specific proposals on the basis of:
 - the maximum reasonable amount of affordable housing under the specific circumstances of the site, including the financial viability of the development,
 - an affordable housing target of 50% of the total addition to housing floorspace, and
 - guidelines of 60% social rented housing and 40% intermediate affordable housing;

- h) minimising the net loss of affordable housing;
- i) regenerating Camden's housing estates and seeking to bring Council stock up to the Decent Homes standard by 2012.

The Council will aim to minimise social polarisation and create mixed and inclusive communities across Camden by:

- j) seeking a diverse range of housing products in the market and affordable sectors to provide a range of homes accessible across the spectrum of household incomes;
- k) seeking a range of self-contained homes of different sizes to meet the Council's identified dwelling-size priorities;
- l) seeking a variety of housing types suitable for different groups, including families, people with mobility difficulties, older people, homeless people and vulnerable people; and
- m) giving priority to development that provides affordable housing and housing for vulnerable people.

The Council will monitor the delivery of additional housing against the target for housing supply, and will seek to maintain supply at the rate necessary to meet or exceed the target. In seeking to maintain the housing supply, the Council will adjust the type and mix of housing sought, having regard to the financial viability of development, the sales or capital value of different house types and tenures, and the needs of different groups.

Making full use of Camden's capacity for housing

- 6.8 The Council has a target of 8,925 additional homes for the plan period of 2010-2025 (595 homes per year), including 6,550 additional self-contained homes (437 homes per year). This is based on the London Plan, related regional guidance, and our assessment of the supply of developable housing land. The London Plan gives a London-wide target of 305,000 additional homes from 2007 to 2017, and a Camden target of 5,950 additional dwellings (an annual monitoring target of 595 additional homes), which is consistent with the Council's 15 year target. As an advance indication for housing trajectories covering the period 2017 to 2027, annex 10 to the London Plan gives an annual range for Camden of 480 to 1,030 additional homes. The Government Office for London and the GLA produced a guidance statement in March 2008 which proposes that boroughs should roll forward the target for 2007 to 2017 as an 'indicative figure' prior to the adoption of new targets based on the London Strategic Housing Land Availability Assessment and Housing Capacity Study 2009 (SHLAA). The Council accepts this approach, and considers that an indicative figure of 595 additional homes per year is a reasonable interim assessment for the period 2017-2025.
- 6.9 Our annual figure of 595 additional homes per year (just under 9,000 homes over 15 years) is made up of three elements. These elements are set out in Annex 10 of the London Plan, and based on the 2004 London Housing Capacity Study:
- 437 additional self-contained homes each year (or just over 6,500 over 15 years). This covers flats and houses (in Use Class C3) that have been newly built, converted from another use, or formed from a net increase in homes in an existing building;
 - 100 additional homes per year that are not self-contained (or 1,500 over 15 years). These are homes that share common facilities or services, such as hostels, residential care homes and grouped bedsit rooms;
 - 59 homes per year for returning vacant stock into housing use (just under 900 homes over 15 years). This count is based on homes that have been unused for at least 6 months.
- 6.10 The Council produces and updates a housing trajectory as part of its Annual Monitoring Report (AMR). The housing trajectory shows how we are bringing forward sites to deliver self-contained homes over the next 15 years, and measures Camden's anticipated performance against our monitoring target for additional self-contained homes. The AMR also monitors the number of vacant dwellings returned to use and the net gain in non-self contained homes each year. For the entire plan period from 2010/11 to 2024/25, on the basis of the Annual Monitoring Report 2008/09, delivery of additional homes is expected to total 12,250 or around 815 per year. This is significantly above Camden's target of 8,925 additional homes over the entire 15 year plan period.
- 6.11 The housing trajectory shows how we are planning to meet our target for 6,550 additional self-contained homes over the entire plan period. Our starting point is sites that have already been allocated in the UDP 2006 development plan, and sites that are emerging in the LDF Site Allocations document. For the first five years of the trajectory, the target for additional self-contained homes can be met from an identified supply of deliverable land in the form of allocated sites, emerging sites and other sites where planning permission has already been granted. For the subsequent ten years, the target can be met from an identified supply of developable land in the form of allocated sites and emerging sites.
- 6.12 The final 10 years of the housing trajectory also includes a figure for 'windfall' sites, which are sites that do not yet have planning permission, and have not been individually identified in a development plan document. We do not rely on these windfalls to meet our target for delivery of self-contained homes, but windfall sites will make a significant contribution to our overall housing delivery, and we consider that they should be included in the trajectory to enable proper planning for infrastructure. This contribution from windfall reflects Camden's circumstances as an inner London Borough with a high turnover in the use of land and high proportion of small sites. The numbers included reflect Camden's history over the period since 2003/04 of completed developments on small-sites delivering fewer than 10 additional homes, and ongoing monitoring suggests that this trend is likely to continue.

- 6.13 Over the period 2010-25, we anticipate that student housing will make up most of Camden's supply of homes that are not self-contained. Our 15-year target is 1,500 non-self contained homes. From 2004 to 2008, the Council granted permission for additional accommodation to house over 1,200 students in blocks designated as student housing, most of which were either complete or under construction by mid 2009. Although many of these include studio flats with en suite bathroom and cooking facilities, each block generally has a common management regime, and some common areas for facilities such as recreation and laundry rooms. Student housing is therefore considered against the monitoring target for homes that are not self-contained. We will seek to manage the development of sites for student housing to ensure that it does not prejudice the availability of sites to meet other housing needs, and particularly the supply of self-contained housing.
- 6.14 The London Strategic Housing Land Availability Assessment and Housing Capacity Study (SHLAA) has been prepared by the GLA with the London boroughs. This will provide a new London-wide housing target and new borough targets through a review of the London Plan. The SHLAA was published in October 2009, and proposes an annual monitoring target for Camden of 665 additional homes per year, including 500 self-contained homes. The sites and housing delivery figures that have been identified in Camden's housing trajectory are consistent with the figures proposed by the SHLAA, and indicate sufficient housing sites are available in Camden to meet future London Plan targets based on the SHLAA.
- 6.15 Of the 12,250 homes anticipated in the housing trajectory, we expect just over 60% to be provided in Camden's growth areas, split primarily between King's Cross, Euston, Tottenham Court Road, West Hampstead Interchange, with limited additional provision at Holborn. Please see policy CS1 – *Distribution of growth* and paragraph 1.7 for more details of how new homes will be distributed around the borough and policy CS2 for our approach to growth areas.
- 6.16 There is potential for some housing development as part of the Council's estate regeneration programme, depending on separate consultation with residents of each estate, a number of these may provide additional homes alongside improved homes for existing occupiers. However, most of the remaining housing target is likely to be provided in small developments, widely spread across the borough, each adding fewer than 10 homes – the 15-year housing trajectory anticipates that around 2,600 homes will be provided from this source.
- 6.17 The London Plan housing targets and Camden's trajectory are based on an assessment of the capacity of the borough in terms of sites that are available for housing. However, we expect the demand for additional homes to vastly exceed the anticipated supply. Household projections predict over 1,000 additional households in Camden each year from 2006 to 2026. This compares with a target for additional homes of only 595 per year, and the trajectory's estimated supply of 815 per year. Furthermore, almost 12,000 households in Camden currently live in unsuitable housing, and almost 6,000 will need to move to more suitable homes (Camden Housing Needs Survey Update 2008). Homes are assessed as unsuitable if households suffer from problems such as overcrowding, major disrepair, mobility difficulties and harassment. Homes that are lost through redevelopment or conversions further widen the gap between supply and demand (the London Plan target is monitored on the basis of net additions). In each year from April 2003 to March 2008, permission was granted in Camden for the loss of 80 or more dwellings.

6.18 The Council aims to close the gap between housing demand and supply by minimising the net loss of existing homes, and by regarding housing as the top priority when considering the future of unused and underused land and buildings. We recognise that there are situations where the loss of homes can be justified (such as where two homes are combined to resolve an overcrowding problem), and will take account of the specific circumstances of existing homes and proposed developments. Similarly, we recognise the need for jobs and services and facilities, acknowledge Camden's wider role within London, and respect the value of Camden's built and natural environments. The priority the Council gives to housing will not override, but will be considered alongside:

- the need to protect some non-residential uses, such as industry, warehousing, community uses and shops across the borough;
- the need to promote Central London as a national and international focus of business, shopping, culture, education, healthcare and research; and
- the characteristics of specific areas, sites and properties.

Details of our approach to preventing the loss of existing homes and treating housing as our priority land-use are included in Camden Development Policies (see policies DP2 – *Making full use of Camden's capacity for housing*, and DP1 – *Mixed use development*).

Securing high quality affordable housing

- 6.19 Camden has a particularly large requirement for additional affordable homes. The Camden Housing Needs Survey Update 2008 indicated that an additional 4,800 affordable homes would be needed in the borough every year to provide for existing households (spread over 5 years) and provide for new households coming forward each year. The Survey Update also indicates that of the households in unsuitable homes, over 7,300 are in affordable housing, and the Update estimates that over 4,500 will need to move to more suitable homes. On the basis of all households in housing need and the supply of homes anticipated by the London Plan target, the Survey Update recommends a balance should be achieved by seeking 50% of additional self-contained homes in the form of affordable housing. The Council will therefore apply 50% of the target for additional self-contained homes as a borough-wide target for the proportion of additional homes that should be affordable, which is broadly consistent with the London Plan's strategic target of 50% across London.
- 6.20 The government defines two types of affordable homes, **social rented** housing and **intermediate affordable** housing. Social rented housing includes housing rented from the Council and other registered affordable housing providers such as Housing Associations and Housing Cooperatives. The government sets targets for social rents ensuring that they remain very much lower than market rents. Intermediate affordable housing costs more than social rented housing, but substantially less than market housing. It caters for occupiers who are unable to afford market housing, such as key-workers and first-time buyers. In Camden, most of the intermediate affordable housing developed up to 2009 has been provided by Housing Associations.
- 6.21 The Housing Needs Survey Update found that almost three-quarters of the Camden households needing affordable housing could afford costs that were higher than social rents. In some circumstances, those households would be able to benefit from intermediate affordable housing, however many of these households would be unlikely to choose intermediate housing in Camden. Some Camden households who can afford significantly more than social rents are likely to opt for cheaper market housing outside the borough (although a wider choice of intermediate housing might lead them to stay). Also, Camden households who can only afford to pay slightly more than social rents are unlikely to be able to afford the intermediate housing within the borough, which is relatively expensive due to high house prices and land costs. To balance these concerns, the Council has set guideline percentages for the split of affordable housing at 60% social rented and 40% intermediate affordable housing. We also support a range of different intermediate housing types to make this category more attractive to Camden households, as set out in paragraph 6.33 of this section.
- 6.22 Given the scale of affordable housing need in the borough, the Council will seek the maximum reasonable amount of affordable housing on development sites in accordance with the London Plan. For development proposals, Development Policy DP3 sets out site-specific considerations for assessing whether an affordable housing contribution is appropriate, and what form it should take. The financial viability of the development is a key consideration.
- 6.23 In Camden, a high proportion of homes are developed in small schemes which cannot practically contribute to the supply of affordable housing, and a small proportion are developed in schemes designated wholly as affordable housing (LB Camden Development Monitoring). The Camden Housing Needs Survey Update indicates that the greatest need for additional affordable homes (particularly social rented homes) is for homes with three bedrooms or more, and the greatest need for additional market housing is for homes with two bedrooms (although there is often a market demand for very large homes). Where negotiations for affordable housing take place on the basis of the number of homes to be provided, developers are reluctant to offer large affordable homes. Taking these factors into account, alongside the Camden Affordable Housing Viability Study 2009, the Council will also seek to negotiate an affordable housing contribution from specific development proposals of 50% of the total addition to housing *floor space*, subject to site-specific considerations. Camden Development Policies give more guidance on how the 50% target will apply, and includes a sliding scale from 10% to 50% for the affordable housing percentage in developments with capacity for fewer than 50 dwellings, together with information regarding the 60% and 40% guideline percentages (see policy DP3). Further details of our approach are set out in our Camden Planning Guidance supplementary document.

- 6.24 On the basis of the annual affordable housing need figure taken from the Camden Housing Needs Survey Update, the annual target for 595 additional homes in the London Plan, and the 50% borough-wide affordable housing target, there is a gap of over 4,000 between the number of new affordable homes needed each year and the target for new supply. The loss of existing affordable housing would serve to widen that gap even further. However, Camden currently has a mismatch between the types and sizes of affordable housing that are most in need and the types of affordable housing that become available from the existing stock. The Council will support proposals that help to adjust the affordable housing stock to fit contemporary and future needs, through redevelopment and conversion (either combining homes to resolve overcrowding, or dividing homes to resolve under-occupation). To balance these factors, the Council will seek to minimise the net loss of affordable housing floorspace, but will not necessarily resist the loss of individual affordable homes. Our Development Policies document gives further guidance on the loss of affordable housing (see policy DP4).
- 6.25 The government defines Decent Homes as homes that are warm, weatherproof and have reasonably modern facilities. It aims to ensure that all social rented housing reaches its Decent Homes standard by 2010. The Council has an ongoing programme of works in place to improve its housing stock, and aims to bring the majority of homes up to the Decent Homes standard by 2012.
- 6.26 To transform all Council housing into Decent Homes, we will need to generate significant funds for investment, including £100 million from an estate regeneration programme. Regeneration is a possibility for estates that have a substantial investment need, have development opportunities that could generate investment capital, and have the potential to create more sustainable communities. In many cases proposals are likely to be based on refurbishment, with redevelopment and infill in some cases. Where estates are identified for possible regeneration initiatives, we will apply 'place-shaping' principles, working with residents and communities to develop a vision for the area. The proposals will aim to address local housing needs directly, achieve high standards of sustainability and energy efficiency, and deliver wider social benefits such as helping people get into work and improving health.
- 6.27 The first group of estates identified are:
- Chester – Balmore;
 - Holly Lodge Estate;
 - Alexandra and Ainsworth/Abbey Area; and
 - Maiden Lane Estate.
- Consultation on the first two of these is relatively advanced, and it is likely that firm proposals will be in place by 2010. The Chester – Balmore regeneration is expected to involve redevelopment and a small increase in the number of homes (there are 25 existing homes). The Holly Lodge Estate regeneration is expected to involve refurbishment, replacing un-modernised bedsit rooms (over 70% vacant) with modern self-contained flats, providing for existing residents and also returning 80 additional homes to use. Consultation with residents on regeneration options for the other two identified estates is continuing.
- 6.28 There are several other residential areas with a large number of social rented homes and housing estates, for example, Gospel Oak. Some of these areas are also expected to benefit from estate regeneration over the period of our Core Strategy, subject to consultation with residents and community support for the initiative.

Tackling social polarisation and creating mixed and inclusive communities

- 6.29 One of the objectives of the government's strategic housing policy is to create mixed and inclusive communities. The Council aims to achieve mixed communities by seeking a range of housing types suitable for households and individuals with different needs. The range of housing sought will include:
- homes affordable for individuals and households across a range of incomes;
 - a mix of homes of different sizes to suit single people, couples, small families and large families;
 - homes suitable for people with mobility difficulties;
 - homes for older people;
 - provision for homeless people and vulnerable people;
 - homes for young adults and students in higher education; and
 - sites suitable for gypsies and travellers and travelling showpeople.
- 6.30 The needs of gypsies and travellers and travelling showpeople are considered in detail in policy CS12. The other listed needs are considered below.
- 6.31 It will not be feasible to include a full range of homes wide enough to meet all needs within every development. On individual sites, we will seek a mix that addresses needs identified at the borough-wide level and local needs, taking into account the characteristics and constraints of the site and area. To achieve inclusive communities, when considering the potential of each site, the Council will give priority to the provision of affordable housing and homes for vulnerable people. Paragraphs 6.46 to 6.48 identify the groups of vulnerable people that most commonly need some form of housing support in the borough.

Affordability across a range of incomes

- 6.32 The split between affordable housing and market housing will not necessarily secure housing suitable for households across the full range of incomes. The Camden Housing Needs Survey Update 2008 show a large gap between the cost of owner-occupation and market rents and a further large gap between the cost of market rents and the cost of social rents. These gaps are present for all sizes of home, but are particularly significant for homes with 4-or-more bedrooms. This could lead to middle-income households being excluded from Camden, creating social polarisation between low income households in social rented accommodation and high income households in owner-occupation.

- 6.33 Intermediate affordable housing is intended to bridge the gap between social rented housing and market housing. For intermediate housing to tackle social polarisation effectively, it needs to be attractive to a range of household types across a range of incomes, including those that aspire to own their own home and those that can only afford to rent. We will therefore support a variety of different types of intermediate housing, including rent, shared-ownership and models where occupiers can switch from rent to shared-ownership. Further guidance on how the Council will seek a variety of intermediate housing types is given our Camden Planning Guidance supplementary planning document.
- 6.34 The number of market rented homes in London grew by 25% from 2001 to 2006 (Greater London Strategic Housing Market Assessment 2008). The private rented sector is the largest source of housing for people who are not eligible for social rented housing and cannot afford to buy. Future growth may be constrained by the availability of buy-to-let mortgages and falling property values, but demand in Camden is expected to remain high. The turnover of occupiers of market rented housing tends to be rapid (particularly given its popularity amongst young adults and students), so localised concentrations of private renting can harm the stability of a community. However, private renting is thought to play a significant role in limiting the social polarisation in the borough, and the Council will seek to actively foster the sector and support private tenancies for people in housing need.
- 6.35 There is limited potential for the Council to mitigate the impact of high cost home ownership in the borough, but there are measures that can assist access to cheaper housing:
- we will positively consider proposals to provide low-cost market housing through innovative funding arrangements, designs and methods of construction;
 - we seek a mix of homes of different sizes, which should include small homes as well as large ones;
 - we will resist development densities that are below the appropriate range given in the London Plan density matrix or below the density of the surrounding area, which will help to prevent a focus on very large luxury homes; and
 - the government offers low interest equity loans to help some households into owner occupation.

Homes of Different Sizes

- 6.36 In 2008, we estimate that there were 99,000 dwellings in Camden (Housing Strategy Statistical Appendix 2008). The dwellings are predominantly self-contained flats and houses, meeting the general needs of households of all ages and sizes. Existing homes, especially those rented from the Council, are generally smaller dwellings – over 40% of Council homes have 1-bedroom or are studio flats, and almost 30% of the remaining stock has only 1 or 2 habitable rooms (Investing in Camden's Homes – Executive Report 23-05-07). Camden Housing Needs Survey Update 2008 indicates that overcrowding is the biggest factor making households' existing homes unsuitable, affecting over 5,000 families in the borough (5.9% of all households).
- 6.37 The range of house sizes sought in Camden should reflect the household sizes we expect to live here. Based on the 2001 Census, we estimate that at least 38% of households need homes with 2-bedrooms or more, although one-person households were the most common type (46% of households). GLA population projections predict that the proportion of one-person households will rise to 51% by 2026, although they give limited information on future household composition. The Camden Housing Needs Survey Update 2008 is the main source of data available on the size of homes needed in Camden.
- 6.38 The Housing Needs Survey Update 2008 uses two models to predict future needs for homes of different sizes on the basis of past migration, past household changes, projected trends, existing overcrowding and households' stated intentions. We have taken into account these models, alongside other factors (such as the reluctance of 'downsizing' households to take-up 1-bedroom accommodation and the limited stock of existing affordable housing with 4-or-more bedrooms), to identify dwelling size priorities.
- 6.39 The Council's dwelling size priorities are as follows:
- for social rented housing – homes with 4-bedroom or more are the highest priority, 3-bedroom homes have a high priority, 2-bedroom homes have a medium priority;
 - for intermediate affordable housing – homes with 3-bedrooms or more are a high priority, but homes of all sizes are required;
 - for market housing – homes with 2-bedrooms are the highest priority, homes with 3-bedrooms and 4-bedrooms or more each have a medium priority.

The dwelling size priorities will guide the mix of housing sought across the borough overall, but do not provide a prescriptive basis for determining the mix of homes on individual sites. Details of how the priorities will be used to guide development proposals are set out in Camden Development Policies (see policy DP5).

People with mobility difficulties

- 6.40 Accessibility issues affect most households at some point (for example, illness, injury, age, using pushchairs). Lifetime Homes are dwellings specifically designed to address a wide-range of mobility difficulties without being tailored to the specific circumstances of a household. The Council expects all dwellings developed in the borough to meet Lifetime Homes standards. Guidance on application of the standards is included in Camden Development Policies (see policy DP6) and our Camden Planning Guidance supplementary document.
- 6.41 Many family households will include someone who needs to use a wheelchair in the home, and will require a home that meets more demanding design standards. The Camden Housing Needs Study Update 2008 estimates that 6.4% of Camden's households include one or more people with a physical disability and that 3.4% of Camden's households include one or more frail elderly people. The Council therefore expects that 10% of homes developed in the borough should either be designed to be wheelchair accessible, or easily adaptable for residents who are wheelchair users, in accordance with the London Plan. Guidance on the 10% policy is set out in Camden Development Policies (see policy DP6) and our Camden Planning Guidance supplementary document.

Older people

- 6.42 Camden currently has a stock of just under 1,800 sheltered homes, around half of which are Council owned. The Council also has slightly fewer than 200 places in residential care homes, and supports care for over 400 other people, split between residential and nursing homes. Approximately half of all care places are outside the borough. People of pensionable age represented around 12.5% of Camden's population in 2001. The number of elderly people is expected to increase up to 2026, although the proportion is only expected to increase marginally.
- 6.43 The Council's strategy for serving older people is aimed at enhancing the support available for people to remain in their own homes or to live as independently as possible in sheltered housing and care homes. We do not anticipate that more people will need to move into sheltered or care homes, but we do anticipate a need to change the character of care homes in the borough. New provision will seek to combine independent living and care on the same sites where possible. Some provision is expected to come from new developments and some from the redevelopment of existing homes for older people. We also expect some care homes to be decommissioned. More details of the changes that the Council expects to take place are set out in Camden Development Policies (see policy DP7). Core Strategy Appendix 1 – *Key infrastructure programmes and projects* sets out the new and improved adult care facilities that will be delivered in Camden within the plan period (see items 21-24).

Homeless people and vulnerable people

- 6.44 The Council works to prevent homelessness, guide households into more settled accommodation, and operates a 'pathway' approach that gradually prepares single homeless people for independent living. Since 2005, this work has achieved a reduction of over 50% in the number of homeless households in temporary accommodation.
- 6.45 We anticipate a continued reduction in the need for temporary accommodation, accompanied by a need for fewer hostel places, and a change in the type of places and support that are needed.

- 6.46 The Council provides care for people with serious mental illnesses in partnership with the Camden and Islington Foundation Trust. In mid-2008, around 2,000 people were receiving support, including around 350 in residential or nursing care, or supported housing. During the period of the Core Strategy, we anticipate an increase of around 10% in the number of people with serious mental illnesses, the need remodel some existing residential accommodation to provide intensive supported housing, and the need to provide some additional intensive support places.
- 6.47 In 2007, the Council supported approximately 100 individual tenancies for people with learning disabilities, although some are in clusters and group living accommodation. We anticipate that most future needs for people with learning disabilities will be met by commissioning support rather than providing designated accommodation. However, during the period of the Core Strategy, there is likely a need for remodel or replace some accommodation and to provide cluster flats with high intensity support for people with complex physical and learning disabilities.
- 6.48 Other groups of vulnerable people who commonly need housing support in Camden include looked-after children/young people leaving care; people at risk of domestic violence; people with alcohol or drug dependencies; and ex-offenders. More details of the Council's approach to providing housing support for vulnerable people are set out in Camden Development Policies (see policy DP8).

Young adults and students in higher education

- 6.49 The young adult age group (16-24 year olds) represented around 14% of Camden's population at the 2001 Census, with almost half (8% of the population) being full-time students aged 19 and over. From 2006 to 2026, this age group is projected to grow much more slowly than the total population, to give an overall reduction in the proportion of young adults.
- 6.50 In 2001 over 15,000 full-time students aged 19 and over were normally resident in Camden during term-time. Many more living outside the borough were registered at higher education institutions with a Camden base. The Camden Housing Needs Survey Update 2008 indicated that almost 28,000 full-time students were registered in Camden based institutions in 2006/07, and continued growth is expected.
- 6.51 The Camden Housing Needs Survey Update 2008 indicates that flats and houses in the private rented sector accommodate over 26,000 Camden households. On the basis of the Camden Private Sector House Conditions Survey 2004, we estimate that almost 9,000 of these households either shared a house or flat, or rented a bedsit room in subdivided premises. Almost 4,000 additional households rented private accommodation in hostels, homes that take lodgers, B&Bs and care homes. The 2001 Census showed that the private rented sector housed a third of Camden's full-time students resident in term time. We consider that the private rented sector is the largest source of housing for young adults with a limited income.

- 6.52 Provided that the existing stock of cheap housing such as bedsit rooms can be protected, we anticipate that the private rented sector will be able to support the modest projected increase in young adults. However, it is apparent that the growth of student numbers could place severe strain on the stock of private rented housing. The Council acknowledges that purpose-built student housing has potential to mitigate pressure on the stock of private rented homes in Camden. Therefore, the Council anticipates that most of the figure for non self-contained homes (1,500 homes from 2010/15 to 2024/25) will be met by developments involving designated student accommodation – although many of these may include studio flats with en suite bathroom and cooking facilities, see paragraph 6.13 of this section.
- 6.53 Although the housing trajectory indicates that there is sufficient housing land to enable Camden to exceed the target for self-contained housing, there is a high demand for student housing and for development sites. We are concerned that provision of student housing and other housing with bedsit rooms and shared facilities could prejudice the availability of sites to meet other housing needs, and particularly the supply of self-contained housing. Therefore, we will seek to manage the development of sites for these forms of housing with shared facilities to ensure that they do not prevent us from meeting other housing needs. When considering the appropriateness of particular proposals for student housing, bedsit rooms, or other housing with shared facilities, the Council will consider:
- the supply of self-contained housing, and whether this is falling short of the Council's target of 437 additional dwellings per year;
 - the effect of the proposal on the supply of land for self-contained housing;
 - whether the site is particularly suitable for affordable housing, housing for older people or housing for vulnerable people (more details of the protection of sites particularly suitable for these groups are set out in Camden Development Policies – see policy DP2); and
 - whether the proposal contributes to creating a mixed and inclusive community.

The Council's approach to student housing, bedsit rooms, and other housing with shared facilities is set out in detail in Camden Development Policies (see policy DP9).

Flexible implementation

- 6.54 London house prices peaked in January 2008, and Camden house prices peaked in May 2008 (Land Registry 2009 data). Between the start of 2008 and mid-2009, there was a reduction in the availability of credit available to land purchasers, developers and home buyers. This has caused large reductions in house prices, transactions, new mortgages, and the number of new developments starting on-site. These changes raise uncertainty over whether the rates of housing and affordable housing delivery achieved up to 2008 can be continued in the future.
- 6.55 There are other uncertainties that arise from these credit conditions. New mortgages for shared ownership and buy-to-let have been particularly affected, which potentially damages delivery of intermediate housing and market rented housing. In contrast, buyers of premium properties have continued to have access to capital, which has pushed market interest towards a small number of very large homes. These changes raise uncertainty about the ability to deliver a range of homes of different sizes that are available across a range of incomes.
- 6.56 Camden's 15-year housing trajectory suggests that the supply of housing will not fall short of the annual target of 595 additional homes (including 437 additional self-contained dwellings) unless completion rates drop significantly below expectations. Nevertheless, given current credit limitations and falling prices in 2009, there is a need to monitor the supply of housing very closely.

- 6.57 If overall housing supply appears to be threatened by economic conditions, there are a number of areas of flexibility in the Council's approach that will enable us to tailor our objectives to the particular circumstances of each proposal with a view to maximising delivery. These include:
- varying the proportion of market and affordable housing;
 - varying the split between social rented housing and intermediate affordable housing;
 - positively considering different forms of intermediate affordable housing to take advantage of the funding and credit that is available;
 - varying the range of home sizes sought, particularly amongst market housing; and
 - reviewing the range of S106 requirements sought to maintain viability.

In negotiating the range of housing types and sizes on individual sites, including the proportion and range of affordable housing, the Council will have regard to the characteristics and constraints of the site and the area, progress towards meeting Camden's housing supply target, the financial viability of the development, the contribution the development makes to the creation of mixed communities, and the Council's other planning objectives.

- 6.58 In seeking to secure the future supply of additional housing, we will seek to work in partnership with many other organisations and agencies involved in the development and funding of housing and affordable housing. These will include our Local Strategic Partners, developers, landowners and private landlords, Housing Associations and other affordable housing providers, the Homes and Communities Agency, government departments and other government agencies, the Mayor/GLA and other local authorities – particularly councils in Central and North London.

CS7. Promoting Camden's centres and shops

- 7.1 Camden benefits from a wide variety of town and neighbourhood centres with different characters and roles, from Camden Town and its famous markets to upmarket Hampstead, from the furniture and electronics shops of Tottenham Court Road to the ethnic restaurants on Drummond Street. Our centres are of great importance to the life of the borough and those that live in, work in and visit it. As well as providing shopping and services and places of work and leisure, they are a focus of activity and community life and provide character and identity to local areas and the borough as a whole.
- 7.2 This section provides a planning framework to ensure that the vibrancy and vitality of Camden's centres is protected and enhanced. It sets out how the Council will integrate land use measures with environmental improvements, infrastructure delivery, partnership working and investment to protect and enhance the character and function of Camden's centres.
- 7.3 Other policies in this Core Strategy are also relevant to the Council's approach to Camden's centres. Policy CS1 identifies most of the borough's town centres as highly accessible areas that are considered to be particularly suitable locations for uses that are likely to lead to a significant increase in travel demand. It also promotes higher densities in these locations and encourages mixed use development in the most accessible centres in the borough, helping to promote mixed, vibrant centres. Policy CS3 provides more detail on these areas. Policy CS11 supports the provision of the transport infrastructure needed to support the continued viability of our centres.
- 7.4 Significant new development for a range of commercial uses is already in the pipeline in the King's Cross/St Pancras area, with a total of 20,000 square metres of additional A1 retail floorspace committed or provided through the development of the King's Cross growth area (outline planning permission granted for approximately 15,500 square metres) and the redevelopment of St Pancras Station (approximately 4,500 square metres). The Camden Retail Study 2008 indicates a need for around 27-31,000 square metres of new retail floorspace in the borough by 2026, in addition to that to be provided at King's Cross and St Pancras.

CS7 – Promoting Camden’s centres and shops

Distribution of retail across Camden

The Council will promote the following distribution of retail growth across the borough:

- a) in the range of 20,000 square metres net retail floorspace at King’s Cross/St Pancras;
- b) in the range of 20-30,000 square metres additional retail at Euston and Camden Town, with the majority expected to take place at Euston;
- c) additional provision as part of redevelopment schemes in the growth areas of Tottenham Court Road, Holborn and West Hampstead Interchange; and
- d) some provision in other town centres and Central London Frontages where opportunities emerge.

We will apply a sequential approach to retail and other town centre uses outside of these areas to support the following network of centres:

Town centres: Camden Town; Kilburn High Road; Finchley Road/Swiss Cottage; Kentish Town; West Hampstead; and Hampstead;

Central London Frontages: Tottenham Court Road/ Charing Cross Road/ New Oxford Street; High Holborn/ Kingsway and the main commercial area around King’s Cross;

Neighbourhood centres: located across the borough;

We will also support:

- limited provision of small shops outside centres to meet local needs; and
- appropriate retail provision in Camden’s **Specialist Shopping Areas:** Covent Garden; Hatton Garden, Museum Street, Drummond Street and Denmark Street.

Protecting and enhancing Camden’s centres

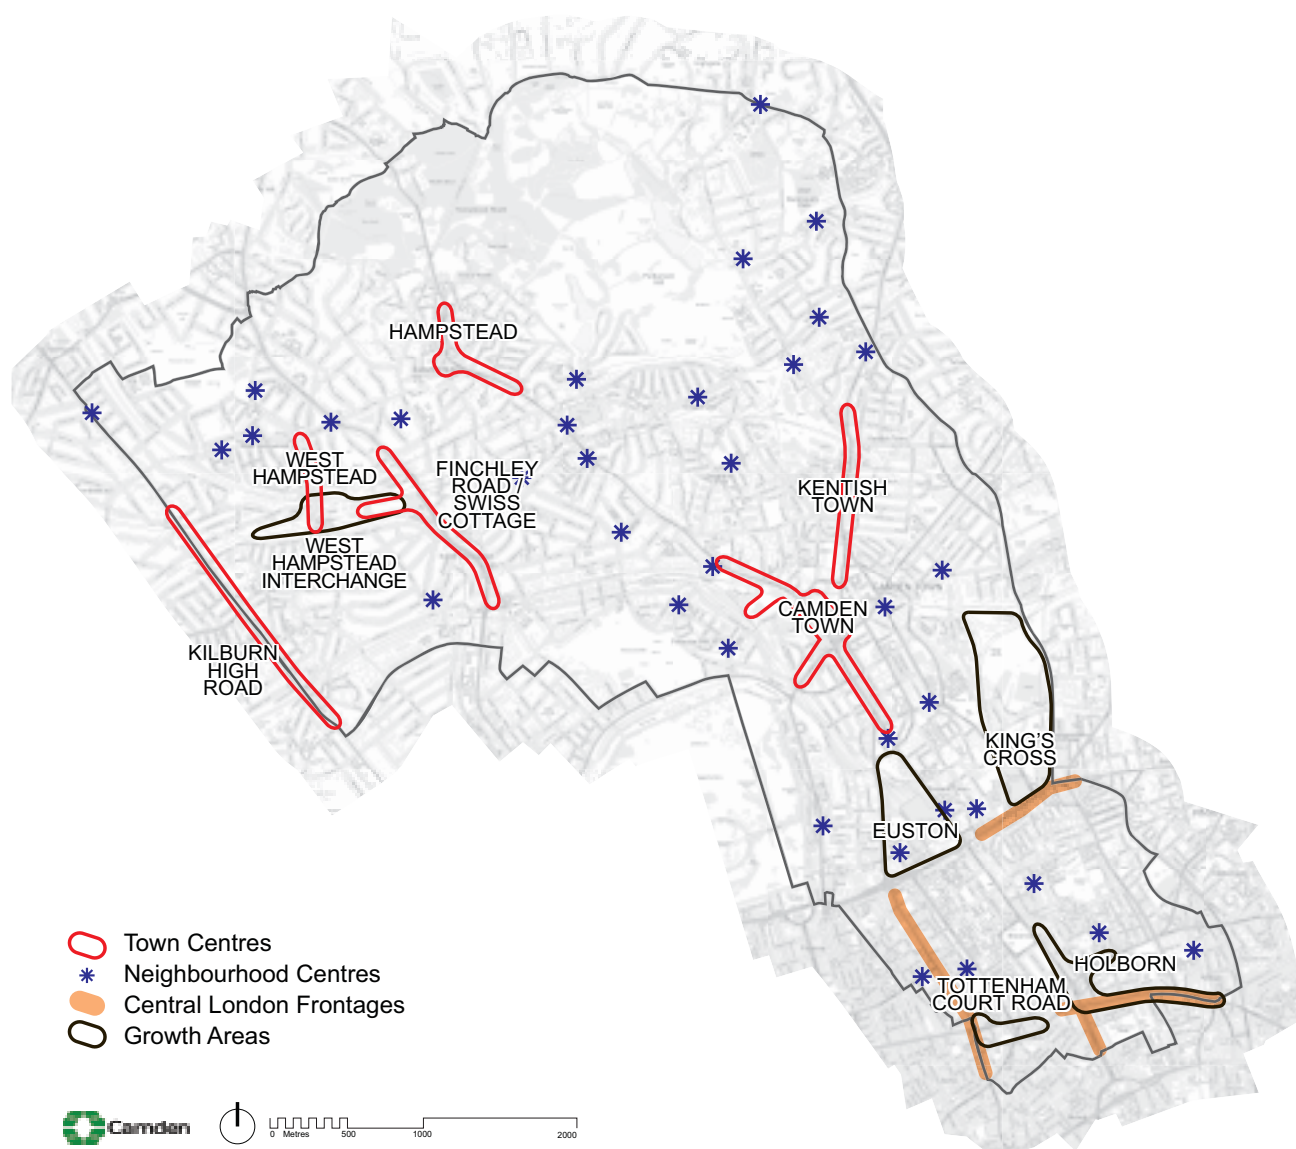

The Council will promote successful and vibrant centres throughout the borough to serve the needs of residents, workers and visitors by:

- e) seeking to protect and enhance the role and unique character of each of Camden’s centres, ensuring that new development is of an appropriate scale and character for the centre in which it is located;
- f) providing for, and maintaining, a range of shops, services, food, drink and entertainment and other suitable uses to provide variety, vibrancy and choice;
- g) protecting and promoting small and independent shops, and resisting the loss of shops where this would cause harm to the character and function of a centre;
- h) making sure that food, drink and entertainment uses do not have a harmful impact on residents and the local area, and focusing such uses in Camden’s Central London Frontages, Town Centres and the King’s Cross Opportunity Area;
- i) supporting and protecting Camden’s local shops, markets and areas of specialist shopping; and
- j) pursuing the individual planning objectives for each centre, as set out below, including through the delivery of environmental, design, transport and public safety measures.

Distribution of retail growth

- 7.5 We will focus new shopping (and related uses) in Camden's designated growth areas and existing centres, having regard to the level of capacity available in these locations. The borough's growth areas and town centres are shown on maps 1 – Key Diagram and 2 – Town Centres.
- 7.6 The growth area of King's Cross will provide the major focus for new shop provision in Camden. The King's Cross Central redevelopment will include shops, services and facilities of a scale similar to a town centre to meet the needs of the large numbers of people who will be living in, working in, or visiting the area. Planning permission has been granted for 45,000 sq m of retail, food and drink floorspace (in A use classes). This will be spread throughout the site and will open in phases. It is currently expected that 65% of the floorspace will be operating by 2016. In addition, substantial new retail has already been approved and built at nearby St Pancras Station (see paragraph 7.4 of this section).

Map 2: Town Centres

This map is based on Ordnance Survey Material with the permission of Ordnance Survey on behalf of the Controller of Her Majesty's Stationery Office ©. Unauthorised reproduction infringes Crown copyright and may lead to prosecution or civil proceedings. Licence number LA100019726, year 2010.

- 7.7 The majority of retail growth above and beyond that at King's Cross and St Pancras will be delivered at Camden Town and Euston, which contain sites suitable for significant retail development. We consider that these locations have the capacity to accommodate in the order of 20-30,000 square metres of additional retail in total. However, the precise quantum and type of retail to be provided on these sites will be subject to detailed site specific assessments, and an assessment of any impacts on other centres. At Camden Town, Hawley Wharf provides an opportunity to deliver new retail floorspace, along with other mixed uses. There is also the opportunity to deliver a significant amount of additional retail floorspace as part of the redevelopment of Euston Station. This is expected to meet demand from people travelling through the station, as well as serving a local catchment, but should not cause harm to the vitality or viability of other nearby centres, including Drummond Street.
- 7.8 It is anticipated that much of the remaining retail requirement will be met through redevelopment in the growth areas of Tottenham Court Road, West Hampstead and Holborn. At Tottenham Court Road and Holborn the redevelopment of existing buildings will enable the provision of new retail, in particular at ground floor level. At West Hampstead, redevelopment should provide additional retail, which will be focused along West End Lane. Some new retail provision is also expected to be achieved in Camden's other town centres and Central London Frontages. Although the Camden Retail Study 2008 found that these other centres have limited opportunities for the provision of additional retail, redevelopment of existing buildings is likely to provide some increases in shop floorspace.
- 7.9 The Camden Site Allocations Local Development Framework document will identify sites that are expected to provide retail floorspace as part of redevelopment schemes.
- 7.10 In line with government Planning Policy Statement (PPS) 4, the Council will take a sequential approach when assessing proposals for new town centre uses (as defined in PPS4), ensuring that such development takes place in appropriate locations, having regard to the distribution of future retail growth established in Policy CS7 and the hierarchy of centres. Further guidance on the sequential approach is set out in Planning Policy Statement (PPS) 4 – *Planning for Sustainable Economic Growth*.

- 7.11 Policy CS7 establishes the hierarchy of centres within the borough. The role and function of Camden's centres varies greatly, reflecting the varied nature of the borough itself:
- Camden's Central London Frontages serve a similar function to town centres or have a London-wide or even national retail role, for example Tottenham Court Road;
 - Camden's town centres vary in terms of their size and role, the kind of shops and services they provide and in the distance people travel to them. While with some centres predominantly serve local needs (for example at Kilburn and Kentish Town), others also attract people from a much wider catchment (for example, Hampstead). Camden Town is a major tourist destination, including for international visitors. In addition to Camden's six town centres, Cricklewood neighbourhood centre forms part of a larger District Centre, with the majority of the centre located to the north of Camden within the boroughs of Barnet and Brent;
 - Camden's 36 neighbourhood centres provide for the day-to-day needs of people living, working and staying nearby (see Map 2 – Town Centres). Due to their relative size, Camden's neighbourhood centres are considered to be equivalent to local centres, as defined in PPS4 (Annex B);
 - Camden's individual, and groups of, specialist shops (for example, Museum Street and Covent Garden) contribute greatly to the variety and character of the borough. Whilst our Specialist Shopping Areas do not form part of our network of centres for the purposes of the sequential approach to new town centre development, we will support the provision of new retail in these centres;
 - A number of smaller shopping parades and individual shops also meet local needs for shopping, services and facilities.

Protecting and enhancing Camden's centres

Protecting and enhancing the character and role of Camden's centres

- 7.12 The development of new shops or other town centre uses, particularly when they are large in scale, can have an impact on other centres. In line with government guidance in Planning Policy Statement (PPS) 4 *Planning for Sustainable Economic Growth*, the Council will seek to protect the vibrancy and vitality of its centres by assessing the impact of proposed town centre uses (as defined in paragraph 7 of PPS4) on Camden's centres. The Council will require an impact assessment for large retail development proposals that are not in accordance with the approach in this Core Strategy and
- would be in an edge of centre or out of centre location, or
 - would be in an existing centre and have the potential to have a harmful impact on other centres.
- 7.13 Further guidance on assessing impact and information on relevant matters to be addressed in retail impact assessments is set out in PPS 4 and the accompanying *Practice guidance on need, impact and the sequential approach*.
- 7.14 The Council will ensure that development in its centres is appropriate to the character, size and role of the centre in which it is located (see below), and does not cause harm to neighbours, the local area or other centres. Shop and service uses (in use classes A1 and A2) and markets are considered suitable for all levels of centre.
- 7.15 The way centres look is an important factor in their character and the way they are perceived – Policy CS14 and policies DP24 and DP25 in Camden Development Policies set out our approach to seeking high design standards and preserving and enhancing Camden's heritage. A number of our centres lie wholly or partly within conservation areas (for example, Camden Town, Hampstead, West Hampstead and many neighbourhood centres), recognising their architectural and/or historical importance. Further information on these areas and guidelines on the Council's approach to protecting them and managing change is set out in individual conservation area statements, appraisals and management strategies. The design of shopfronts can contribute greatly to the character of centres and their distinctiveness. Our approach to shopfronts is set out in Camden Development Policies (policy DP30) and the Council's Camden Planning Guidance supplementary planning document.

Ensuring a range of shops and other town centre uses

- 7.16 The success of a centre is strongly influenced by the variety and choice of shops, services and other uses within it. Policy DP12 in Camden Development Policies sets out more detail on our approach to protecting the character, function, vitality and viability of our centres through managing the mix of uses in them and ensuring that development does not cause harm to a centre, to its neighbours or to the local area. Camden has used a range of information sources, including the Camden Retail Study 2008 and comments from local residents and businesses to establish what our approach should be for each centre. The centre specific planning objectives set out below provide objectives for each of Camden's centres, and address the mix of retail and non-retail uses sought. Tourist uses such as hotels and employment generating uses such as offices can make an important contribution to the economic success of town centres – our approach to these uses is set out in policy CS8 and policies DP13 and DP14 of Camden Development Policies. Community and cultural uses add to the vitality and vibrancy of Camden's centres by adding to the diversity of uses in an area, and the variety of activities that take place at different times of the day. Camden's approach to these uses is set out in Core Strategy policy CS10 and Development Policy DP15.
- 7.17 Small and independent shops contribute to the character and diversity of Camden's centres by adding to the choice and variety of shopping facilities available, and avoiding centres being dominated by national multiple retailers. The contribution of small and independent shops to the character and attractiveness of many of Camden's centres is highlighted in the Camden Retail Study. The Council will seek to promote the provision of small units where appropriate and independent shops where possible. We will also seek to protect shops, including those on small shopping parades, where their loss would cause harm to a centre or local area. Our detailed approach to protecting shops and promoting small and independent businesses is set out in Camden Development Policies (policy DP10).

Minimising the impact of food, drink and entertainment uses

- 7.18 Food, drink and entertainment uses add to the diversity and vibrancy of Camden's centres and bring activity to them outside normal shopping hours. This includes the borough's rich culture of live music, dance and theatre, as well as restaurants and bars. These uses are important to the borough socially, culturally and economically, and contribute to Camden's image as a vibrant and attractive place. However, local residents can be affected by disturbance and anti-social behaviour associated with some of the people visiting such premises, particularly premises serving alcohol. The dense, mixed-use nature of much of the borough, means that it is particularly important that town centre uses such as food, drink and entertainment uses are managed so that they do not cause harm to surrounding communities and the local environment. The Council wants to see the borough continue to be a successful location for food, drink and entertainment uses while making sure that the quality of life of local people, workers and visitors is not harmed. Policy DP12 in Camden Development Policies sets out more detailed information regarding the Council's approach to managing the impact of food, drink, entertainment and other town centre uses.

- 7.19 Food, drink and entertainment uses, such as restaurants, pubs and bars, music venues, cafés and hot food take-aways, are most appropriately located in commercial areas to minimise their impact on the amenity of local residents. Town centres and Central London Frontages are considered the most suitable locations for such uses. Some food, drink and entertainment premises will also be provided in Camden's growth areas, in particular at King's Cross. The Council wishes to see a range of such uses for all age groups within its centres, not just those that primarily involve drinking.
- 7.20 The Council recognises that individual small-scale food and drink uses outside larger centres can be important local facilities, reducing the need to travel and providing community meeting places. It therefore considers that neighbourhood centres are suitable for small-scale food and drink uses (generally less than 100 square metres) which serve a local catchment, provided they do not cause harm to the surrounding area or residents.
- 7.21 The Council's responsibilities as a licensing authority, separate to its planning functions, gives it additional influence on premises that sell alcohol and/or provide regulated entertainment or late-night refreshment. The Council's approach to licensing is set out in Camden's Statement of Licensing Policy. See also Policy CS17 – *Making Camden a safer place*.
- 7.22 The Council has also produced a series of area planning documents (for Camden Town, Central London, West Hampstead and Finchley Road/Swiss Cottage) which give more detailed guidance on how the Council will treat planning applications for shops, food, drink and entertainment uses in particular centres, taking into account their specific circumstances.

Camden's markets and areas of specialist shopping

- 7.23 Camden is well served by markets, ranging from street markets such as Inverness Street, Chalton Street, Leather Lane and Queens Crescent to the world famous Camden Town markets (e.g. the Stables and Camden Lock markets). Markets add greatly to the variety, interest and attraction of shopping in the borough and are a source of local employment, often providing more flexible and casual work opportunities. Street markets can be an important source of fresh food, often grown more locally than food from supermarkets. They can also help to meet the specialist food needs of ethnic communities; black and minority ethnic groups tend to make significantly more use of local markets than the general population.
- 7.24 It is important that markets are carefully managed to prevent any potential negative impacts such as congestion and litter. The Camden Development Policies document sets out detail on the Council's approach to planning applications involving markets (see policy DP11).
- 7.25 Camden has a number of areas which provide specialist shopping, drawing people from beyond Camden and often from beyond London. These include the area around Museum Street for antiquarian books, prints and coins; Hatton Garden for jewellery; Denmark Street for music; Charing Cross Road for books; Tottenham Court Road for furniture and electronics; Drummond Street for ethnic Asian shops and restaurants; and parts of Covent Garden and Camden Town for fashion. Like markets, these specialist shopping areas help to provide variety and individuality that is in contrast to the more standard range of shops found in many centres.
- 7.26 The Council aims to support and protect these areas, which make a great contribution towards the attractiveness and diversity of the borough. Camden's specialist shopping areas fall within Central London and Camden Town, for which we have produced specific area guidance. These recognise the role of our specialist shopping areas and, although councils have limited powers to protect specific retail uses, use the influence available to support and encourage them; for example, by restricting changes from shops (in use class A1) to other uses to maintain a stock of suitable premises.

Centre-specific planning objectives

- 7.27 Each of Camden's centres has its own character and role. These are described below, alongside the Council's objectives for each centre. The Council will expect development in our centres to reflect the character and role of the centre in which it is located, and meet our stated objectives for that centre.

- 7.28 The Council and its partners undertake a range of work to improve and support our centres. This includes improvements to the street environment and transport provision and measures to improve public safety and prevent crime and anti-social behaviour. Policy CS11 – *Promoting sustainable and efficient travel* and Appendix 1 – *Key infrastructure programmes and projects* (items 39-50, 55 and 56) give details of the delivery of the transport infrastructure improvements and public space enhancements that will benefit and support our town centres and Central London. These improvements will play a crucial role in helping to deliver our centre-specific objectives.
- 7.29 The way that town centres are managed can have an important impact on the success of a centre. The Council is currently in the process of reviewing its Town Centre Management Strategy, and is setting up appropriate management structures in order to pursue continued improvements to its centres. Town centre management will play an important role in taking forward the Council's objectives for each of its centres.

Centre specific planning objectives

Camden Town

Camden Town is a vibrant centre, internationally famous for its unique markets, independent fashion and its music and entertainment venues such as the Roundhouse and Koko. It is also home to many residents and to numerous businesses, small and large, notably media, cultural and creative industries, attracted by the area's unique atmosphere. Camden Town is the borough's biggest centre with the largest range of shops and services, and is designated as a Major Centre in the London Plan. The centre does not have a single character but broadly contains three parts – the commercial heart in the markets and around Camden Town tube station; the southern section which provides more traditional 'high street' shopping and serves a more local role; and Chalk Farm Road to the north with its mixed street frontage of restaurants, bars and specialist shops. A cluster of creative industries in the areas around Camden High Street also adds to the centre's vibrancy. The Camden Retail Study 2008 found that there is demand for the expansion of shop chains into the market area, which could drive up rents and threaten the traders in smaller shop units that provide much of Camden Town's attraction as a shopping destination.

Although Camden Town is a successful centre, it faces challenges in terms of crime and anti-social behaviour. The centre is recognised as a priority for the Council and its partners in Camden's Community Strategy. The challenge is to make Camden Town a successful and safe place with something for local people and visitors of all ages, without losing important aspects of its unique character.

The Council's approach to supporting and promoting the success of Camden Town will include:

- **improving the street environment and pedestrian movement, and reducing negative traffic impacts generated along Camden High Street.** The Council has a programme of works to improve streets and spaces in Camden Town. Camden Town Unlimited have produced *Camden Town First – Streets, Spaces and Places – A Vision for Change* which sets out the business community's aims for improving Camden Town's environment. We will also continue to seek improvements to Regent's Canal, which contributes to the unique character and setting of the centre;
- **making Camden Town feel safer through community safety measures.** We will continue to work with the police and other agencies to reduce the overall crime rate in Camden Town. Camden's Community Safety Partnership Strategy, *Camden Safe*, sets out specific targets and actions to reduce crime and anti-social behaviour in the area. All development should include appropriate design measures to prevent crime and anti-social behaviour;
- **seeking to protect the special character and attractiveness of Camden Town by pursuing the continued provision of small shop units.** Development schemes in the upper part of Camden High Street/markets area (north of Inverness Street and south of the railway bridge) will be expected to provide small shop units consistent with this part of the centre, which is characterised by small ground floor premises. Larger units in this location would be harmful to the character and diversity of Camden Town, and to the viability of small, independent traders. As a guide, units larger than 100 sq m will not be permitted in this part of the centre. Larger shop units will be supported in the southern part of Camden High Street;
- **supporting and promoting the creative industries sector in Camden Town.** Camden Town has significant opportunities to develop its creative industries, given the large number of existing media, cultural and other creative businesses that are clustered around Camden High Street, and opportunities resulting from the nearby redevelopment and transport improvements at King's Cross. We will seek to enable the growth of this sector by: supporting the provision of new, high quality offices, studios, workshops and other premises, and working in partnership with Camden Town Unlimited, to actively support, promote and attract creative industries to the area;

- managing the balance of retail and leisure uses.** The Council will continue to ensure that the majority of uses on the southern part of Camden Town (south of the Jamestown Road) are in retail use, whilst allowing for more equal balance between retail and non-retail uses to the north, as set out in our Revised Planning Guidance for Camden Town supplementary document. The Council will welcome uses that add to the centre's choice of facilities and attractions for people of different ages;
- ensuring that Camden has a well-managed night time economy.** Our planning guidance for Camden Town aims to manage the location and concentration of food, drink and entertainment uses, particularly those which operate late into the evening, so they enhance the area through their contribution to its attraction and vibrancy and do not cause harm to the quality of life of local people or the character of the area and its other uses and activities. The Council's Statement of Licensing Policy contains special policies on the cumulative impact of these uses in Camden Town that restrict new premises licences and new club premises certificates;
- retaining the special built character of Camden Town by promoting high quality design** of buildings, shopfronts, signage etc that reflects the scale and character of Camden Town centre. The Council has produced Conservation Area Appraisals and Management Strategies for the Camden Town conservation area and the Regent's Canal conservation area, which includes part of Chalk Farm Road. We will take these into account when assessing planning applications for sites in the area. We will seek to retain the distinctive and varied character of the area's heritage assets such as conservation areas and will expect new development to contribute positively to them;
- promoting and protecting Camden Town's markets.** Camden's markets (Camden Lock, Stables, Canal, Inverness Street and Camden (Buck Street) markets) are a fundamental element in the success and vitality of Camden town centre as well as being an important tourist attraction. Please see above and the Camden Development Policies (policy DP11) for further information on our approach to markets;
- supporting transport improvements,** in particular improvements to Camden Town Underground Station, and changes to traffic circulation; and
- identifying development opportunities.** Camden Site Allocations will set out the Council's approach to major development sites in the borough to help deliver the objectives of the Core Strategy and will include sites within Camden Town.

Kilburn High Road

Kilburn High Road straddles the border of Camden and Brent, and is the second largest centre in the borough. It has a large number of small, independent shops and relatively few national chain stores. Although it is designated as a major centre in the London Plan, the centre mostly serves the day-to-day needs of the local population. The Camden Retail Study 2008 found that the economic performance of Kilburn has improved. It also found that the area's evening economy is strong, in particular to the northern end of the High Road, which contains a range of cultural and leisure uses. This is a continuation of Kilburn's historical role as a meeting place and destination for music and other cultural purposes. The southern end of Kilburn High Road has benefited from a number of mixed developments in recent years.

The Council considers that Kilburn will continue its current role serving a predominantly local catchment, while seeking to enable the High Road to take better advantage of its relatively affluent local population, and improving the overall balance and quality of retail available. The Council will continue to work with its partners, in particular the London Borough of Brent and the police, to make the town centre cleaner, safer and more successful.

As there are limited development opportunities on the Camden side of Kilburn High Road, the Council will focus on improving what already exists. A number of ways in which improvements can be achieved go beyond the scope of town planning and relate to management and partnership working; for example, more high quality shop frontages to increase the quality and attractiveness of the centre. The Council work with its partners to investigate providing funding and advice to shop owners to pursue these improvements.

The Council will:

- enhance the street and public spaces through the delivery of further improvement projects in order to make Kilburn High Road a more attractive centre. Where possible, the area's history and heritage should be used to inform the design of schemes to reinforce Kilburn's identity;
- seek to make the High Road a diverse and vibrant centre that takes advantage of its strengths. We will place an emphasis on three 'zones': a shopping core to the centre; a mixed use, cultural zone to the north; and a mixed use zone to the south of Kilburn High Road station. We will focus shopping provision in the core of the centre and allow a wider range of other uses elsewhere – see our Camden Planning Guidance supplementary planning document for more detail on our approach;
- seek the provision of larger units as part of development proposals in the core of the centre, in order to attract a wider range of retailers to the area;
- enhance the character and quality of the 'cultural zone' to the north of the High Road, consolidating and building on the success and attractiveness of existing uses, such as the Tricycle Theatre, music and comedy venues and the range of diverse shops, restaurants, cafes and pubs; and
- improve safety and the perception of safety in Kilburn High Road by requiring development to include appropriate design measures to prevent crime and anti-social behaviour.

Finchley Road/Swiss Cottage

The main shopping area of Finchley Road/Swiss Cottage runs from the O2 Centre, with its concentration of food, drink and entertainment uses, to Swiss Cottage Underground Station, while the refurbished Swiss Cottage Leisure Centre and the listed Swiss Cottage Library provide a focus to the south. The centre runs either side of the busy A41 Finchley Road (managed by Transport for London), which creates a barrier between the two sides of the centre, restricting pedestrian movement and creating a poor environment for visitors. Finchley Road/ Swiss Cottage town centre generally serves the local population, a role which is expected to continue. We have expanded the town centre boundary to include Swiss Cottage Library and Leisure Centre and the Hampstead Theatre (see Map 16), which provide a focus for the south of the centre.

The Council will:

- support the core shopping area and manage the location, concentration and impact of food, drink and entertainment uses in line with the Council's Planning Guidance for Finchley Road/Swiss Cottage in order to protect the character of the centre and the amenity of neighbouring residents;
- work with TfL to improve pedestrian links across Finchley Road, and to assess long term opportunities to reduce traffic impacts along the road, including the possible removal of the one way traffic gyratory;
- promote enhancements to the local environment. We will work with TfL to assess how further pedestrian improvements could be delivered for the centre, including works to improve the public area around Swiss Cottage station; and
- improve 'gateways' into the Centre from key side streets to the west and east of Finchley Road, as proposed in the Camden Local Implementation Plan 2005/06-2010/11.

West Hampstead

West Hampstead centre provides for local people's day-to-day needs for convenience and comparison shopping. It is highly accessible by public transport, with three stations (Thameslink, London Underground and London Overground). West Hampstead Interchange is identified as a growth area in this Core Strategy and the London Plan (see policy CS1 above – Distribution of growth). The extent of the growth area differs from that of the town centre, although the two intersect along West End Lane, between Broadhurst Gardens and the Thameslink station.

The northern end of the centre lies within the West End Green/Parsifal Road Conservation Area and has a high quality environment with a 'village' character. The southern end of the centre around the stations is less attractive and has a poor quality pedestrian environment, although the southernmost part of the centre is in the Swiss Cottage Conservation Area. West Hampstead has relatively high proportions of convenience (food), retail and A3 (restaurants and cafes) uses, many of which are independent.

The Council will seek to ensure that West Hampstead continues to provide a mix of uses to serve the local area, but will avoid further loss of ground floor retail uses. We will:

- work with Transport for London and other partners to improve interchange between rail, underground and bus services and improve the ease of pedestrian movement in the area (see CS11 – *Promoting sustainable and efficient travel*);
- seek to improve the street environment south of West End Green, in particular, to enhance the street scene around the transport interchange area between Broadhurst Gardens and the Thameslink station;
- ensure that development around the interchange provides an appropriate mix of uses and contributes towards improved interchange facilities and a high quality street environment (see CS1 – *Distribution of growth*);
- seek to control the location and concentration of food, drink and entertainment uses in West Hampstead town centre to ensure that they do not cause harm to residents or the character and retail function of the centre by applying the guidance set out in the Council's Supplementary Planning Document for West Hampstead; and
- make sure that development conserves or enhances the special character and appearance of West Hampstead by applying the guidance in the conservation area statements for the area.

Kentish Town

Kentish Town centre provides shopping and service uses for the local area. The Camden Retail Study 2008 found that Kentish Town has a good range of shops and services for a centre of its size, with many independent traders, and a significant amount of food and drink uses.

Although the centre has recently been subject to improvements to the street environment and pedestrian movement, it remains congested for much of the day, bringing noise and pollution impacts for users of the centre.

The Council will:

- support the character and retail role of Kentish Town by managing the proportions of non-retail premises, in line with the approach set out in the Council's Camden Planning Guidance supplementary planning document;
- deliver further street and public space improvements to enhance conditions for pedestrians and reduce the impact of traffic on the centre, including changes to traffic signals, further pedestrian crossing improvements and new local squares; and
- improve the canopy area next to Kentish Town train station, and investigate the possibility of access via a bridge from the canopy area to Kentish Town Overground Station.

Around £500,000 has been secured from TfL to complete the proposals set out above, which form part of the five-year £4 million *Improving Kentish Town* project which is currently being delivered by the Council.

Hampstead

Although one of the smallest of Camden's centres, Hampstead draws more people from outside the borough than any town centre after Camden Town. Visitors are attracted to the area by its high quality environment, 'village' feel and upmarket shops, cafes and bars. The whole centre is within the Hampstead conservation area and includes many listed buildings, recognising its special character and architectural and historic importance. Opportunities to expand Hampstead centre are limited by environmental constraints and a lack of potential development sites.

The Council will focus on protecting Hampstead's current special character, attractiveness and success as a centre, enabling the centre to continue its role as a retail and leisure destination serving a wide catchment area, as well as the needs of the local population. In order to pursue these aims, the Council will:

- expect development in Hampstead to be of the highest quality design and be sensitive to the area's unique character and heritage assets. Development should be consistent with the Council's Hampstead conservation area statement;
- expect proposals for new or altered shopfronts to preserve or enhance the character and appearance of the centre and respect the original frontages;
- deliver small scale street and public space improvements to enhance conditions for pedestrians, where needed; and
- focus shopping provision in the core of the centre by managing the proportions of non-retail uses – see the Council's Camden Planning Guidance supplementary planning document for more detail on our approach.

Central London Frontages

Central London contains a number of shopping and service areas as part of its diverse mix of uses. These range from larger areas predominantly serving workers and visitors to neighbourhood centres serving local residents to areas of specialist shopping. The main shopping streets in Camden's Central London area have been designated as Central London Frontages. The Council's approach to these areas is set out below.

The Council's Planning Guidance for Central London supplementary document provides detailed information on our approach to food, drink, entertainment, specialist and retail uses in Central London. We will take this into account when assessing relevant planning applications in the area. Core Strategy Policy CS11 (Promoting sustainable and efficient travel) sets out in brief how the Council will improve public spaces across Central London. The Council will deliver improved pedestrian environment and signage along key routes, enhancing links between Camden's Central London area with the rest of the West End, and with key transport hubs, including King's Cross, St Pancras and Euston stations.

Tottenham Court Road/Charing Cross Road

This Central London Frontage operates as an extension to the West End and therefore attracts people from throughout London as well as visitors to the capital. It covers Tottenham Court Road, part of New Oxford Street, and the eastern side of Charing Cross Road as far as Cambridge Circus (the western side of Charing Cross Road falls within the City of Westminster). Tottenham Court Road and part of New Oxford Street lie within the West End Retail Special Policy Area designated in the London Plan.

Tottenham Court Road is well-known for its concentration of furniture and electrical goods stores and the Camden Retail Study 2008 found that it was performing well. The area around Tottenham Court Road Station is identified as a growth area in this Core Strategy and the London Plan. Policies CS1 – *Distribution of growth* and CS2 – *Growth areas* set out the Council's approach to development in the area.

Charing Cross Road also has a specialist retail role, with many book and music shops. The Camden Retail Study highlights the need to improve the pedestrian environment at Charing Cross, particularly towards its northern end.

The Council considers that Tottenham Court Road and Charing Cross Road are both likely to continue in their existing specialist retail roles, but considers that significant improvements to the pedestrian environment will be required to address current accessibility issues and to support increased pedestrian flow as a result of growth and the arrival of Crossrail. This will be particularly important at St Giles Circus, given its key location at the junction of Oxford Street and Tottenham Court Road, and its proximity to Tottenham Court Road station.

The Council will:

- promote and preserve the specialist retail character of Tottenham Court Road and Charing Cross Road by managing the level of shop and food, drink and entertainment uses in these areas, in line with the approach set out in our Planning Guidance for Central London supplementary planning document;
- support the expansion of the Central London Frontage and new retail uses along New Oxford Street, where this would not cause harm to residential amenity. Additional retail growth along the Central London Frontage will be achieved through redevelopment and refurbishment of existing premises;
- pursue significant improvements to the local pedestrian environment, including at St Giles Circus;
- work with Transport for London to investigate opportunities to turn Tottenham Court Road into a two-way road; and
- expect development to include appropriate measures to prevent crime and anti-social behaviour.

Holborn

This comprises the shopping streets of High Holborn/Holborn (from the junction of New Oxford Street to Holborn Circus), and most of Kingsway south of High Holborn. It primarily operates as a town centre for local workers and businesses, with a mix of comparison and convenience stores, banks and building societies, sandwich shops and other food and drink uses. The Holborn area is largely characterised by offices, and large office entrances often break up the frontage. Holborn is identified as a growth area in this Core Strategy and the London Plan. Details of the Council's approach to development in the area are set out in policies CS1 – *Distribution of growth* and CS2 – *Growth areas*.

The Council will seek to increase the availability of ground floor retail uses at Holborn in order to create more active public spaces and a more cohesive local shopping and service area. The Council will:

- promote the shopping and service character of Holborn Central London Frontage by managing the level of shop and food, drink and entertainment premises in the area, in line with the approach set out in our Planning Guidance for Central London supplementary document;
- manage the night time economy using the Council's Planning Guidance for Central London supplementary document. In addition, the Council's Statement of Licensing Policy contains special policies on the cumulative impact of these uses in Holborn, which restrict new premises licences and new club premises certificates;
- expect the provision at ground floor level of new shop premises, or other appropriate uses, as part of the redevelopment of properties that do not currently contribute to the shopping and service character of the Frontage;
- improve pedestrian linkages with the West End through street enhancements;
- work with Transport for London to investigate opportunities to improve or change the gyratory system; and
- expect development to include appropriate measures to prevent crime and anti-social behaviour.

King's Cross/Euston Road

This Central London Frontage is the main commercial area around King's Cross, including parts of Euston Road, King's Cross Road and Grays Inn Road. Active ground floor uses along these roads are not continuous, but are broken up by large uses such as King's Cross and St Pancras stations, the British Library and Camden Town Hall. The eastern and western parts of this Central London Frontage have different characteristics. The eastern part is characterised by small or medium scale buildings with a mix of commercial uses on the ground floor serving local residents, workers and travellers, with residential, hotel and office accommodation above. Pressure for additional food and drink uses here has generally been resisted in order to preserve the character and function of this area, and to prevent unacceptable cumulative impacts. The western part mainly consists of large office and hotel buildings. The ground floors of many of these buildings contain shops or food and drink uses which serve the local worker and hotel populations.

King's Cross and Euston are identified as growth areas in this Core Strategy (see Policy CS1 – *Distribution of growth*) and the London Plan. However, the growth areas are geographically separate to the King's Cross/ Euston Road Central London Frontage (see Map 2). The Council will work with its partners to ensure that growth contributes to improving the quality of the shopping environment along the frontage, particularly at the eastern end, reflecting its position as a gateway to London and a key new business area.

The Council will:

- resist proposals for further loss of retail uses or for additional food, drink and entertainment uses in the eastern part of this Central London Frontage in order to protect the retail role of the frontage and to prevent unacceptable cumulative impacts. The exception to this is the block bounded by Pentonville Road, King's Cross Bridge and St Chad's Place, where there is currently no housing and redevelopment may provide opportunities for food, drink and entertainment activities, as well as retail space;
- encourage the introduction of active ground floor uses, such as shops and other appropriate uses, as part of the redevelopment of existing buildings that currently do not have an active ground floor use;
- permit additional food, drink and entertainment uses in the western part of the Frontage provided that they do not undermine the area's retail function and the mix of uses in the area, in line with the approach set out in Camden's Planning Guidance for Central London supplementary document;
- expect development to include appropriate design measures to prevent crime and anti-social behaviour, in order to make King's Cross and Euston feel safer; and
- seek to improve the street scene along the frontage, particularly at the eastern end, including working with TfL to identify opportunities to enhance the pedestrian environment and crossing opportunities along Euston Road and Pentonville Road.

Neighbourhood Centres

Camden has over 30 neighbourhood centres which cater for the day-to-day shopping and service needs of their local populations. They contain a range of uses including shops, food and drinks uses, doctor's and dentist's surgeries and financial and professional services, and often have housing on upper floors. Housing is the Council's preferred use above ground floor level in neighbourhood centres and we will promote the residential use of vacant or underused floors. Commercial and community uses are considered acceptable uses of upper floors providing they do not cause harm to the amenity of existing residents or introduce activity that would prejudice future residential use on other levels or in neighbouring properties.

The Council will seek to retain a strong element of convenience shopping for local residents in Camden's neighbourhood centres and ensure that any development in them does not harm the function, character or success of that centre. We will take into account the individual character of the centre when assessing development proposals but, as a guide, we will resist schemes that would result in less than half of ground floor premises in a neighbourhood centre from being in retail use or in more than three consecutive premises being in non-retail use. We will also take into account any history of vacancy in shop units and the prospect of achieving an alternative occupier for vacant premises.

Applications for food, drink and entertainment uses will be carefully assessed to minimise the impact on local residents and the local area (see above). The Camden Development Policies document contains the Council's detailed policies to manage the impact of food, drink and entertainment uses (see policy DP12).

CS9. Achieving a successful Central London

- 9.1 The southern part of Camden plays an important part in providing the vibrancy, diversity and identity that makes the borough such a popular place to visit and live in. It forms part of Central London whose unique role, character and mix of uses provides much of the capital's distinctiveness. Camden's Central London area:
- is a key part of the nation's capital and a major international city;
 - is part of London's Central Activities Zone (CAZ) – see below;
 - has a significant residential population adding to its life and diversity and supporting economic and other functions;
 - has a concentration of nationally important medical, research and higher education institutions;
 - is a major business and employment centre and the main focus of Camden's economy. It contains a significant proportion of the borough's office floorspace, a variety of shopping areas, from neighbourhood centres to specialist retail locations like Covent Garden, and is home to many other uses, including legal, health and professional services; food, drink and entertainment and cultural and tourism uses;
 - contains many areas with their own characters and identities – e.g. Fitzrovia, Museum Street area, Hatton Garden and Covent Garden – and many places with a high quality and/or historic environment, for example, conservation areas, listed buildings and London Squares; and
 - has excellent public transport links to the rest of London and the UK and routes to mainland Europe.

The extent of Camden's Central London Area is shown in Map 17 in Appendix 6. This area forms part of the Central Activities Zone (CAZ) designated in the London Plan, which extends across nine boroughs. The Central Activities Zone is the core of the capital with a unique cluster of activities contributing to London's role as a 'world city'.

- 9.2 Central London will experience much of the growth identified for Camden in future years, concentrated in the growth areas of King's Cross, Euston, Tottenham Court Road and Holborn. In addition, due to its high level of accessibility other parts of central London may be considered to be a suitable location for uses which attract a large number of journeys. Please see policy CS2 for our approach to growth areas and CS3 on other highly accessible areas. Policy CS9 sets out our approach to the unique pressures and challenges faced by Central London and how we will manage growth in the area to ensure it brings benefits to the borough and beyond and protects and enhances the factors that make a popular place to live, visit and do business.
- 9.3 The challenges facing Central London include managing significant development pressures to ensure that development in growth areas and other locations links with and supports existing communities, and ensuring that its variety of uses can operate and thrive without causing harm to each other. To maintain the character and vibrancy that is provided by Central London's residential communities, there is a need to continue to provide a range of homes including affordable housing, and necessary community facilities and open space. Road and public transport congestion, air quality, noise, the quality of streets and spaces, the management of the night time economy and reducing opportunities for crime and anti-social behaviour are also important issues in this part of the borough.

CS POLICY

CS9 – Achieving a successful Central London

The Council will support and promote the Central London area of Camden as a successful and vibrant part of the capital to live in, work in and visit. We will:

- a) recognise its unique role, character and challenges;
- b) support Central London as a focus for Camden's future growth in homes, offices, hotels, shops and other uses;
- c) seek to ensure that development in Central London, in the growth areas of King's Cross, Euston, Tottenham Court Road and Holborn and beyond, contributes to London's economic, social and cultural role while meeting the needs of local residents and respecting their quality of life;
- d) support residential communities within Central London by protecting amenity and supporting community facilities;
- e) seek to secure additional housing and affordable homes, including as part of appropriate mixed use developments;
- f) take into account the specific identity of the areas within Central London when taking decisions on planning applications and in relevant initiatives and works;
- g) promote and protect areas of specialist activity, such as the Museum Street area and Hatton Garden;
- h) support the concentration of medical, educational, cultural and research institutions within central London;
- i) preserve and enhance the area's historic environment;
- j) seek to improve the quality of the area's streets and places, the connections between them and the ease of movement into, and through, the area;
- k) continue to designate Central London as a Clear Zone Region to reduce congestion, promote walking and cycling and improve air quality;
- l) promote improved community safety;
- m) manage the location and concentration of food, drink and entertainment uses and their impact;
- n) allocate sites within Central London for appropriate uses, including offices and housing, in the Camden Site Allocations document.

- 9.4 The Council will seek to promote a successful Central London area while achieving a balance between the interests of its residents and the area's economic, social and cultural use and roles. As Central London experiences the most intense development pressures in the borough and contains a diverse and dense mix of uses, including a significant residential community, the need to ensure that development supports the continued success of the area but does not cause harm to its neighbours is particularly acute in this part of the borough (please see policy CS5 and policy DP26 – *Managing the impact of development on occupiers and neighbours* in Camden Development Policies).
- 9.5 Central London is the location of most of Camden's growth areas (King's Cross, Euston, Tottenham Court Road, Holborn). Development in these areas, and throughout Central London, should contribute to the area economically, socially and environmentally, through providing a substantial number of new jobs and space for businesses; supporting community facilities; protecting and improving the amenity of local residents; being of high quality design and by contributing to improving open space. Camden's Central London area will continue to be the borough's economic focus, contributing to the success of the Central Activities Zone (CAZ) and London's role as a major global city, and providing the majority of jobs in Camden. This Core Strategy identifies Central London as the focus of the majority of future office and retail development in the borough over the next 15 years, with King's Cross the location of a substantial proportion of this growth (please see policies CS8 – *Promoting a successful and inclusive Camden economy* and CS7 – *Promoting Camden's centres and shops*).

- 9.6 Camden's Central London area is a major draw for Londoners and for tourists visiting the city, making a significant contribution to the attractiveness and economy of both the borough and the capital. Attractions include the British Museum, Covent Garden, Hatton Garden and numerous theatres, bars and restaurants. These are also used by Camden residents and are therefore important local facilities. Central London is considered an appropriate location for facilities that attract large numbers of visitors; however, it is important that these do not harm to local character or amenity or cause congestion. (See policies CS1 – *Distribution of growth*, policy CS2 – *Growth areas*, CS3 – *Other highly accessible areas* and Camden Development Policies policy DP14 – *Tourism development and visitor accommodation*).
- 9.7 Policy CS7 – *Promoting Camden's centres and shops* (supported by policy DP12 in Camden Development Policies) seeks to make sure that new food, drink and entertainment uses do not cause harm to our centres, the local area or the amenity of residents. This is a particular issue in Covent Garden and other parts of Central London. Within Covent Garden and the Charing Cross Road area, new entertainment uses will only be allowed where they are small in scale, have a low impact and will not result in an increased concentration of late night uses. The Council has produced area-specific Planning Guidance for Central London which seeks to manage the location and concentration of food, drink and entertainment uses, particularly those which operate late into the evening, so they contribute to Central London's vibrancy in a way that does not harm the quality of life of local people, the character of the area or other uses or activities. It gives detailed guidance on how the Council will consider the potential impacts of proposals for food, drink and entertainment uses and protect the amenity of residents. In addition, Camden's Statement of Licensing Policy 2008 recognises the concentration of licensed premises in the Seven Dials area of Covent Garden and identifies it as an area subject to special policies on cumulative impact, with a presumption against applications for new premises licences and new club premises certificates.

- 9.8 In addition to providing detailed, locally specific guidance on food, drink and entertainment uses, our Planning Guidance for Central London supplementary document also makes wider recognition of the challenges and pressures experienced in the area. The Guidance recognises that the local areas within Central London, and their residential communities, have different characteristics and pressures. For each local area, it identifies specific issues and provides guidance on how the Council will seek to manage competing interests so that development does not cause harm to the character of the area or the amenity of local residents. The Council will take into account Planning Guidance for Central London when making decisions on planning applications in the area.
- 9.9 There are many conservation areas in Camden's Central London area (Bloomsbury, Charlotte Street, Denmark Street, Hatton Garden, King's Cross, Seven Dials and parts of Regent's Canal and Regent's Park), covering the majority of the area, as well as number of historic London Squares and many listed buildings. This illustrates the high quality of much of the area's built environment and reflects its historical and architectural importance. The Council will take the conservation area statements, appraisals and management strategies for these areas into account when assessing planning applications for sites in the area. We will seek to make sure that the design of new development contributes positively to the area and respects Central London's full range of heritage assets.
- 9.10 The Council is undertaking many schemes to encourage walking and cycling in Central London and improve its street environment. For example, we work jointly with Westminster and the City of London in the Clear Zone Partnership, which covers the Central London area (see policies CS14 – *Promoting high quality places and conserving our heritage* and policy DP32 – *Air quality and Camden's Clear Zone* in Camden Development Policies). Works in the area include physical improvements to make streets more pedestrian and cycle friendly; enhancing historic streets by improving paving and lighting; and better signage to help pedestrians find their way around the area.
- 9.11 The Camden Site Allocations document will identify the main development opportunities in Central London and set the framework for their development. More detail on our approach to a number of the issues mentioned above is set out in the Camden Development Policies document.

CS11. Promoting sustainable and efficient travel

- 11.1 Camden benefits from excellent transport provision, including a direct link to continental Europe through St Pancras International; national rail services at King's Cross, St Pancras and Euston; 23 tube stations within the borough or on its boundary, 55 bus routes and 27 night bus routes. These provide excellent accessibility within Camden, to the rest of London and beyond. However, the borough also faces considerable challenges in relation to transport. Its road and public transport networks are subject to significant congestion, and air quality is a serious issue.
- 11.2 The Council needs to address these challenges and ensure that transport provision contributes towards our approach to managing the significant growth in the borough, as set out in Section 1. Policy CS11 promotes a range of sustainable transport measures and the delivery of additional infrastructure to support growth and relieve existing pressures on the transport system. It builds on, and helps to deliver, the sustainable transport priorities established in the Council's Green Transport Strategy. This aims to encourage more walking and cycling and reduce traffic in the borough by 15% from 2001 levels.

CS POLICY

CS11 – Promoting sustainable and efficient travel

The Council will promote the delivery of transport infrastructure and the availability of sustainable transport choices in order to support Camden's growth, reduce the environmental impact of travel, and relieve pressure on the borough's transport network.

Improving strategic transport infrastructure to support growth

The Council will promote key transport infrastructure proposals to support Camden's growth, in particular:

- a) King's Cross station improvements;
- b) the redevelopment of Euston Station and the provision of an improved public transport interchange;
- c) Crossrail services and associated station improvements at Tottenham Court Road;
- d) improved interchange at West Hampstead;
- e) improvements to facilities at Camden's London Underground and Overground stations, including at Camden Town and Holborn; and
- f) improvements to encourage walking and cycling as part of transport infrastructure works.

The Council will protect existing and proposed transport infrastructure (including routes for walking, cycling and public transport, interchange points, depots and storage facilities) against removal or severance.

Promoting sustainable travel

In order to support Camden's growth and to promote walking, cycling and public transport, the Council will:

- g) improve public spaces and pedestrian links across the borough, including by focusing public realm investment in Camden's town centres and the Central London area, and extending the 'Legible London' scheme;

- h) continue to improve facilities for cyclists, including increasing the availability of cycle parking, helping to deliver the London Cycle Hire Scheme, and enhancing cycle links; and
- i) work with Transport for London to improve the bus network and deliver related infrastructure, and support proposals to improve services and capacity on the tube, London Overground and Thameslink.

Making private transport more sustainable

As part of its approach to minimising congestion and addressing the environmental impacts of travel, the Council will:

- j) expand the availability of car clubs and pool cars as an alternative to the private car;
- k) minimise provision for private parking in new developments, in particular through:
 - car free developments in the borough's most accessible locations and
 - car capped developments;
- l) restrict new public parking and promote the re-use of existing car parks, where appropriate;
- m) promote the use of low emission vehicles, including through the provision of electric charging points; and
- n) ensure that growth and development has regard to Camden's road hierarchy and does not cause harm to the management of the road network.

Promoting the sustainable movement of freight

The Council will seek to reduce freight movement by road; encourage the movement of goods by canal, rail and bicycle; and minimise the impact of freight movement on local amenity, traffic and the environment.

Improving strategic transport infrastructure to support growth

- 11.3 The strategic transport infrastructure projects identified in policy CS11 will play a central role in supporting future growth in the borough, with the development concentrated in locations that are, or will be, subject to significant improvements to transport facilities, services and capacity. The key infrastructure programmes and projects identified in Appendix 1 set out further details regarding these schemes, including delivery timescales and responsibilities, and sources of funding (items 39-50). Map 3 shows Camden's key existing and proposed transport infrastructure.

Map 3: Transport

This map is based on Ordnance Survey Material with the permission of Ordnance Survey on behalf of the Controller of Her Majesty's Stationery Office ©. Unauthorised reproduction infringes Crown copyright and may lead to prosecution or civil proceedings. Licence number LA100019726, year 2010.

11.4 All of Camden's growth areas (see policies CS1 and CS2) will be subject to significant improvements in strategic transport infrastructure:

- King's Cross will benefit from improved station facilities, significant tube capacity increases and improved service capacity and frequency on the Thameslink line;
- Euston will also benefit from an improved station and associated facilities and significant tube capacity increases. The Council will seek to deliver enhanced walking and cycling links to surrounding areas from both Euston and King's Cross;
- Tottenham Court Road Station is due to be served by Crossrail by 2018 and there will be a new Crossrail station linked to Tottenham Court Road underground station. The Underground station will also benefit from substantial improvements and from additional tube capacity through planned Northern Line upgrades. The Council will work with its partners to ensure that walking links are improved around the station in order to accommodate the expected increase in pedestrian activity in the area;
- Holborn will benefit from increased tube capacity through the Piccadilly Line upgrade and, over the longer term, the Council will pursue opportunities to deliver substantial improvements to Holborn Underground station, although funding for such works has not yet been identified. The provision of a Crossrail interchange at Farringdon, located adjacent to the borough boundary in Islington, will provide additional capacity to the south east of the borough. This and measures at Tottenham Court Road may help to alleviate current pressure on Holborn station. Improvements to pedestrian signage through the 'Legible London' scheme should also make it easier for pedestrians to find their way around the area; and
- West Hampstead will benefit from improved service capacity at its Jubilee Line and London Overground stations, as well as increased service frequency and capacity at its Thameslink station. In addition, the Council and Transport for London are currently investigating a range of measures to improve pedestrian linkages in the interchange area between West Hampstead's three stations, including addressing the need to widen pavements, and remodelling station entrances.

11.5 All of Camden's town centres are served by at least one tube or Overground station, each of which will benefit from planned improvements to service capacity and, in some cases, increased service frequency (see Appendix 1 – items 43 and 44). Planned Northern Line capacity improvements have the potential to help to relieve current peak time congestion at Camden Town station. Neighbouring tube stations at Chalk Farm and Mornington Crescent will also benefit from Northern Line capacity improvements, which should also help to relieve pressure at Camden Town station. Although funding is not currently identified for the planned redevelopment of Camden Town Underground station, the Council has published a planning brief for the site and will pursue opportunities to deliver a better functioning, more accessible station that relieves congestion issues. Camden Road overground station will also benefit from planned capacity and service improvements on the North London Line.

11.6 The Council considers that the scale of transport improvements focussed on Camden's main growth areas means that, in the event that any individual scheme is postponed or cancelled, sufficient transport infrastructure will be provided and other measures secured to support the levels of growth envisaged. For example, the range of planned tube, London Overground and rail

capacity improvements means that, if any single scheme did not occur, there will still be increased capacity on other lines. Also, walking, cycling and bus links will continue to be improved, and where appropriate, enhanced to meet reductions in planned capacity elsewhere.

- 11.7 Given the constraints on transport capacity in a densely developed area like Camden, almost every part of the existing transport infrastructure is a valuable asset. The Council will therefore seek to protect all existing and proposed facilities and links (including for Crossrail 2, also known as the Chelsea – Hackney Line), and safeguard the potential for improvements to the transport network. The Mayor of London's *Land for Transport Functions* supplementary guidance sets out further information on protecting land for transport.

Promoting sustainable travel options

- 11.8 The Council will complement the provision of strategic transport infrastructure by working to improve local level sustainable transport measures. Camden's Local Implementation Plan (LIP) sets out how we intend to deliver more sustainable transport, and is a key mechanism for the implementation of the transport objectives set out in this Core Strategy, including applying for the necessary project funding from Transport for London.

Walking

- 11.9 Walking is a 'zero carbon' form of travel that relieves pressure on infrastructure, both in terms of public transport infrastructure and Camden's roads. As such, the promotion of walking is an essential element of our approach to managing Camden's growth. It also provides significant wider social benefits in terms of promoting more active, healthy lifestyles (see policy CS16 *Improving Camden's health and well-being*), and helping to create more active vibrant streets and public spaces. Camden's Community Strategy seeks to improve conditions for pedestrians, and Camden's Walking Plan seeks to promote walking in the borough and to improve the street environment.
- 11.10 Policy CS14 – *Promoting high quality places and preserving our heritage* sets out the Council's approach providing attractive streets and spaces. Camden's Local Implementation Plan sets out key planned projects that will enhance our streets and spaces and provides a particular focus on the delivery of improvements in Camden's town centres and Central London. This reflects the higher level of activity in these areas, and the need to relieve current pressure on the public transport system by enhancing links between visitor generators and transport hubs. It also supports Camden's approach to future development by focusing improvements on locations that include the borough's growth areas. The Council will work with British Waterways, Natural England, other land owners/developers and users to improve the Regent's Canal and its towpath, which forms a main east-west pedestrian and cycle route through the borough (see Map 1 and policy CS15).
- 11.11 Improved pedestrian signage to help people find their way is also an important factor in encouraging more people to walk for shorter journeys, rather than using the car, tube or bus. Camden's Local Implementation Plan sets out how the Council will make it easier for people to find their way around through the 'Legible London' scheme, which provides new, simple signage for pedestrians. The Council is currently working with Transport for London and other partners, including neighbouring boroughs, to expand the initiative across the Central London Area. We will seek to extend the scheme throughout the borough – prioritising key destinations and localised centres where there is a concentration of amenities and a high level of pedestrian activity, including our town centres. New signage in these areas will be expected to reflect Legible London standards.
- 11.12 Public realm improvements will primarily be delivered by the Council using funds from Transport for London, to be sought through Camden's Local Implementation Plan. The Council's own funding and, where appropriate, developer contributions and will also be used to finance projects to promote walking. The Council will continue to work with Transport for London and neighbouring London boroughs to deliver improved pedestrian accessibility across borough boundaries. Camden is a member of the cross-borough Clear Zone Partnership, a key mechanism for delivering improvements to walking routes across Central London, linking King's Cross and Euston with Bloomsbury and Holborn, through to the River Thames and the West End (see policy DP32 in Camden Development Policies).

Cycling

- 11.13 As with walking, cycling is a sustainable means of travel that provides the opportunity to relieve congestion as well as promoting healthy, active lifestyles. Camden's Cycling Plan (Fourth Review 2008) seeks to promote increased cycling in the borough by improving cycling facilities and routes. We will:
- ensure that all opportunities are taken to maximise the availability of new cycle parking across the borough both in new developments and more widely in any areas where there is need for increased provision, such as at town and local centres. This will principally be delivered through Camden's Parking Standards for new developments (see policy DP18 in Camden Development Policies) and as part of town centre improvement projects;
 - provide 'cycle stations' in appropriate locations across the borough. These are cycle parking facilities available to the public, usually in a secure area with restricted access. Appropriate locations would include town centres, Central London and major transport interchanges. Such stations have already been secured as part of approved schemes at King's Cross (1,000 bicycle spaces) and Regent's Place/Euston Tower (around 70 spaces).
 - improve cycle links across the borough to encourage more cycling. We will seek to ensure that developments contribute to and, where appropriate, provide appropriate links with strategic cycle routes, including the London Cycle Network (a network of radial and orbital routes for cyclists throughout London); and
 - work with Transport for London and other partners, including neighbouring boroughs, to implement the London Cycle Hire Scheme. The scheme was introduced by the Transport for London Business Plan 2009/10-2017/18, and aims to provide places, firstly in Central London, then across the capital, where people can pick up and drop off bicycles. We will seek to ensure that the scheme is extended to key destinations across the borough, including our town centres.

Public transport

- 11.14 Camden will benefit from planned improvements to London Underground, London Overground and Thameslink service capacity, as well as the delivery of Crossrail. Between 2009 and 2020, Transport for London plans to significantly improve capacity on the Jubilee; Victoria; Northern; Piccadilly; and District, Hammersmith and City lines, as well as the London Overground North London Line, all of which pass through the borough. Also, the Thameslink train line serving St Pancras International is planned to benefit from significantly improved capacity and service frequency by 2015. Crossrail will provide a major new east-west train link through London, and help to support growth in the capital by tackling congestion and the lack of capacity on the existing rail network. The Mayor has introduced a policy in the London Plan and prepared Supplementary Planning Guidance - Use of planning obligations in the funding of Crossrail, to seek financial contributions from new developments towards the delivery of Crossrail, which is due to be completed by 2017. Please see Appendix 1 for further details on planned public transport infrastructure improvements (items 39-44).
- 11.15 In partnership with Transport for London, which manages the bus network across London, the Council will seek to ensure that Camden's growth is matched by improvements in bus services, where required. This will include provision of new bus facilities (for example, bus stops) where appropriate. Policies DP16 and DP17 in our Camden Development Policies Local Development Framework document set out the Council's expectations for new development in relation to transport capacity and public transport contributions.

Travel Awareness

- 11.16 The Council also works to encourage more sustainable travel in schools, businesses and communities through its travel awareness programme. We also work with schools and businesses to produce Travel Plans, which provide a package of measures to encourage safe, healthy and sustainable travel options, including through reducing the need to travel and unnecessary car journeys, and promoting active means of transport such as walking and cycling. Camden is part of the North Central Travel Plan Network, a group of north and central London boroughs (supported by Transport for London) that offers advice to businesses to help them to develop travel plans.

Making private transport more sustainable

- 11.17 The Council will continue to limit the amount of parking available for private cars. This represents a key part of our approach to addressing congestion, promoting sustainable transport choices, and facilitating the delivery of pedestrian and cycle improvements by maximising the amount of public space available to provide new walking and cycling facilities. Our approach to car parking will seek car-free development in the most accessible parts of the borough (Central London, town centres (except Hampstead) and other areas that are well-served by public transport). We will also seek car-capped developments where the provision of additional on-street parking would be harmful to parking conditions. Please see policies DP18 and DP19 in Camden's Development Policies for more on our approach.
- 11.18 For journeys where more sustainable travel options are not practical, car clubs and car pools offer an alternative to privately owned cars. Car clubs are hire schemes that allow households to avoid the costs of car ownership, deter them from using cars for a trip which is convenient without one, and reduce the amount of car parking space needed. For business journeys, car pools have many similar advantages, and can remove the need for business-users to commute by car. The Council will seek to expand the availability of car clubs and car pools by encouraging provision for them as part of proposals involving additional parking (see policy DP18 in Camden Development Policies), as well as working with operators to secure more car club spaces on Camden's roads where demand is identified.
- 11.19 Another part of the Council's strategy to promote more sustainable travel options is to allow the loss of existing public car parks, where appropriate. This helps to promote the use of sustainable transport by limiting the availability of parking spaces, and also promotes more efficient use of land in the borough. For further details, please see policy DP19 in Camden Development Policies.
- 11.20 We will also encourage low emission vehicles by increasing the availability of electric charging points across the borough. Although still contributing to congestion, these vehicles do not have the air quality impacts of ordinary cars. Where provision for the use of private cars in new developments is unavoidable, the Council will therefore seek provisions such as electric charging points (see policy DP18 in Camden Development Policies).
- 11.21 The demand for movement, deliveries and car parking on Camden's roads already exceeds the space available, meaning that effective management of Camden's road network is essential. The Council will seek to ensure that new development does not cause harm to Camden's road hierarchy, or to the ability of Council (and for strategic roads, Transport for London) to manage the road network. Policy DP21 in Camden Development Policies sets out our requirements regarding connections to the road network from developments.

- 11.22 A number of Camden's centres, in particular Camden Town and Swiss Cottage, suffer from a poor pedestrian environment due to gyratory systems that hinder movement and create a poor quality public realm. This has a negative impact on local amenity and the quality of life in these centres. While the Council acknowledges that these roads are important to maintaining smooth traffic flow through London, it will work with Transport for London to investigate long-term opportunities to remove or significantly alter these gyratories for the benefit of these centres and the people that use them.

Promoting the sustainable movement of goods

- 11.23 The movement of goods can have a significant impact on the environment, in terms of noise and disturbance, and air pollution. These impacts are particularly severe in an urban, densely populated borough, such as Camden. The Council will therefore seek to minimise the movement of goods and materials by road by:
- promoting alternative forms of freight movement that have lower environmental impacts, such as the use of Regent's Canal, rail freight and the use of cycle-freight as an extension to cycle courier services; and
 - seeking to deliver more efficient goods movement. We will work with our partners to explore the potential for a freight consolidation facility to serve Camden's Central London Area. These facilities are transfer and distribution centres that consolidate loads from a number of vehicles into single loads for delivery to a specific destination or area.
- 11.24 We will work with our partners, including Transport for London, developers, freight operators and businesses to assess how these aims could be achieved, including for the servicing of new developments both during construction and when in use. Camden is part of the Freight Quality Partnership for Central London, which brings together retailers, freight operators, Central London boroughs, and Transport for London to consider ways to achieve more efficient and sustainable movement of freight.
- 11.25 The Council will also seek to ensure that the impact of construction traffic and the servicing of future developments are kept to a minimum. Policy DP20 in Camden Development Policies sets out how we will seek to minimise the impact of freight movement from development. We are working with Transport for London to investigate opportunities to provide charging points for low emission goods vehicles, which can have a lower impact than normal vehicles in terms of both air pollution and noise.

CS14. Promoting high quality places and conserving our heritage

- 14.1 Camden does not have a single built character but is made up of many diverse areas, each with their own identity. The southern part of the borough, which forms part of Central London, is characterised by a high density built environment and complex mix of uses. The central part of the borough contains several town centres surrounded by areas of medium-density housing and some employment uses. The north of the borough is predominantly residential of a lower density with substantial open space at Hampstead Heath. Throughout the borough there are examples of Camden's unique architectural heritage, with many high quality buildings and places, old and new. This is reflected in our large number of conservation areas and listed buildings, which have been recognised for their special architectural or historic interest.
- 14.2 Our overall strategy is to sustainably manage growth in Camden so it meets our needs for homes, jobs and services in a way that conserves and enhances the features that make the borough such an attractive place to live, work and visit. Policy CS14 plays a key part in achieving this by setting out our approach to conserving and, where possible, enhancing our heritage and valued places, and to ensuring that development is of the highest standard and reflects, and where possible improves, its local area. Policy CS13 above and policy DP22 in Camden Development Policies set out our approach to ensuring that design in the borough is sustainable and that schemes include measures to minimise the effects of, and adapt to, climate change.

CS POLICY

CS14 – Promoting high quality places and conserving our heritage

The Council will ensure that Camden's places and buildings are attractive, safe and easy to use by:

- a) requiring development of the highest standard of design that respects local context and character;
- b) preserving and enhancing Camden's rich and diverse heritage assets and their settings, including conservation areas, listed buildings, archaeological remains, scheduled ancient monuments and historic parks and gardens;
- c) promoting high quality landscaping and works to streets and public spaces;
- d) seeking the highest standards of access in all buildings and places and requiring schemes to be designed to be inclusive and accessible;
- e) protecting important views of St Paul's Cathedral and the Palace of Westminster from sites inside and outside the borough and protecting important local views.

Excellence in design

- 14.3 Camden has many special and unique places and historic and modern buildings of the highest quality. As well as preserving this rich heritage, we should also be contributing to it by making sure that we create buildings of equally high quality that will be appreciated by future generations. The design of the places and buildings that make up our local environment affects us all and our quality of life. High quality design is visually interesting and attractive but it is not just about what things look like. Good design makes places that put people first, are welcoming, feel safe and are enjoyable and easy to use for everyone, whether they are living in, working in or just passing through the borough.

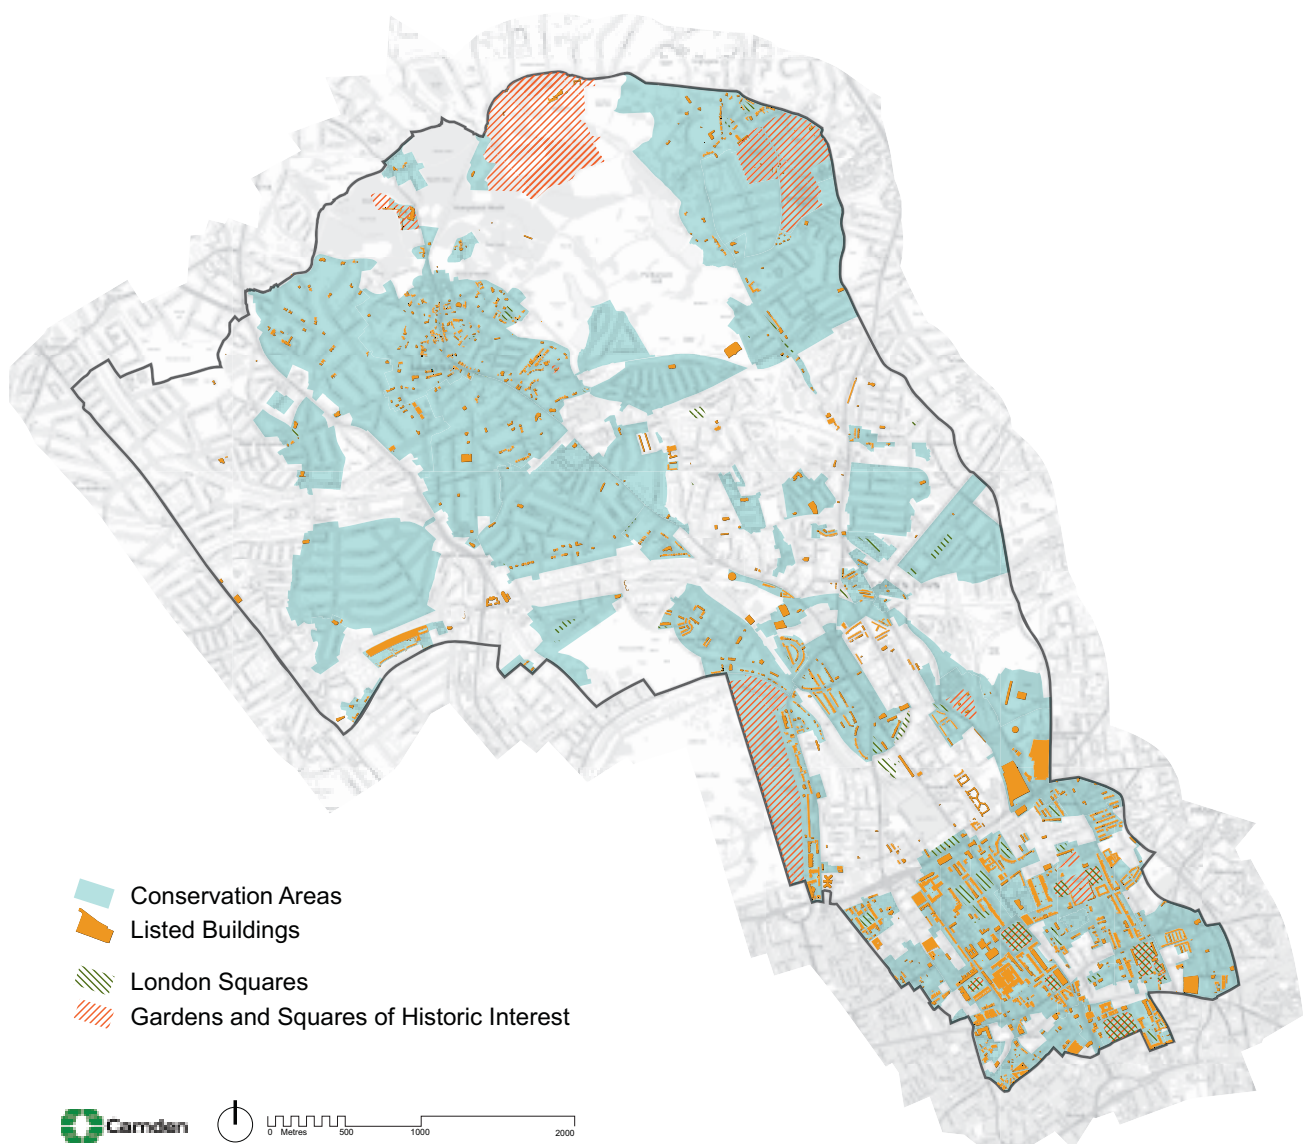

- 14.4 Development schemes should improve the quality of buildings, landscaping and the street environment and, through this, improve the experience of the borough for residents and visitors. The Council will therefore insist on high quality design throughout the borough. In accordance with government guidance in Planning Policy Statement (PPS) 1 – *Delivering Sustainable Development* we will not accept design that is considered inappropriate to its context or which fails to take opportunities to improve the character and quality of an area and the way it functions. Please see Camden Development Policies (policy DP24) for more detailed guidance on our approach to the design of new development and alterations and extensions. When assessing design, we will also take into account government/CABE guidance *By Design – Urban Design in the planning system: towards better practice* and our own Camden Planning Guidance supplementary document.
- 14.5 The Council is working with its partners to promote and celebrate excellence in design and improve public buildings, landscaping and the street environment; for example through the Camden Design Initiative, which seeks to improve public space and the built environment and encourage involvement, awareness and understanding of good design, including the bi-annual Camden Design Awards, which recognise high quality and innovative designs.
- 14.6 Good design is safe and accessible, and responds flexibly to the needs of its users. It creates buildings that have minimal negative impact on the environment, during construction and beyond. The construction and use of buildings currently accounts for around half of national carbon emissions and it is therefore vital that new and redeveloped buildings are designed to have a beneficial impact on their environment. See CS13 – *Tackling climate change through promoting higher environmental standards* and CS17 – *Making Camden a safer place* for our approach to these matters.
- 14.7 High quality design also takes account of its surroundings and what is distinctive and valued about the local area. Camden is made up of a diversity of areas, each with their own distinctive character, created by many elements such as architectural style and layout, social and economic history, landscaping and mix of uses – as summarised in the description of Camden’s character below. As Camden is a densely built-up borough where most development involves the replacement, extension or conversion of existing buildings, taking account of context and local character is particularly important. The Council will therefore expect the design of buildings and places to respond to the local area and its defining characteristics and reinforce or, if appropriate, create local distinctiveness.
- 14.8 While tall buildings offer the opportunity for intensive use, their siting and design should be carefully considered in order to not detract from the nature of surrounding places and the quality of life for those living and working around them. Applications for tall buildings will be assessed against policy CS14 and policies DP24 – *Securing high quality design* and DP25 – *Conserving Camden’s heritage* in Camden Development Policies, along with the full range of policies on mixed use, sustainability, amenity and microclimate. and other relevant policies. Effect on views, impact on local microclimate and provision of communal and private amenity space will also be important considerations.

Camden's heritage

- 14.9 Camden has a rich architectural heritage with many special places and buildings from throughout Camden's history (see map 6). 39 areas, covering much of the borough, are designated as conservation areas, recognising their special architectural or historic interest and their character and appearance. We have prepared conservation area statements, appraisals and management strategies that provide further guidance on the character of these areas. We will take these documents into account as material considerations when we assess applications for planning permission and conservation area consent in these areas.
- 14.10 Over 5,600 buildings and structures in Camden are nationally listed for their special historical or architectural interest, and 53 of the borough's squares are protected by the London Squares Preservation Act 1931. In addition, 14 open spaces in Camden are on English Heritage's Register of Parks and Gardens of Special Historic Interest. The Council will consult with English Heritage over proposals affecting these parks and gardens. We also encourage the restoration and management of Parks and Gardens of Special Historic Interest and London Squares to enhance their value. Camden also has a generally well-preserved archaeological heritage, with 13 identified archaeological priority areas, although this can be vulnerable to modern development and land use.

Map 6: Heritage

- 14.11 We have a responsibility to preserve and, where possible, enhance our heritage of important areas and buildings. Policy DP25 in Camden Development Policies provides more detailed guidance on the Council's approach to protecting and enriching the range of features that make up our built heritage.
- 14.12 Architectural detail, materials, colour and structures such as walls can make a significant contribution to the appearance of an area, but can often be altered without the need for planning permission. Cumulatively, many minor building works can gradually erode the quality of an area and undermine the quality of conservation areas. We will therefore make use of 'Article 4 Directions' in appropriate locations to bring some minor works under planning control. We are intending to introduce such measures in the conservation areas of Belsize, Hampstead, and Swiss Cottage, where loss of historic character through cumulative change is apparent. Primrose Hill conservation area already benefits from a comprehensive Article 4 Direction, which has helped to retain its high quality historic character.

Landscaping and public realm

- 14.13 The quality of our streets and public spaces affects the quality of all our lives. We enjoy being in and passing through attractive, clean and well-maintained places, but are discouraged from walking in and through areas with a poor environment. An enhanced public realm should integrate transport and land use, contribute to improved walking and cycling environments, respect and reinforce local identity and character, attract people to the area and encourage the use of streets and public spaces to create diverse, vibrant and lively places.
- 14.14 The Council is committed to improving Camden's streets and public spaces and has carried out many improvement schemes with many more ongoing and planned. We have produced a Camden Streetscape Design Manual to raise the standard of street works throughout the borough. This sets standards for our own works and provides guidance for other agencies. It encourages respect for local character and promotes high quality, clutter-free design to make streets and public places that are safe and easy to use for all.
- 14.15 A number of studies on streets and spaces have been produced, particularly for the south of the borough (e.g. Bloomsbury, King's Cross and St Giles/Tottenham Court Road). These have been commissioned and funded by a range of organisations (including TfL, LDA, Design for London and UCL) sometimes in partnership with the Council. It is procedurally difficult for the Council to adopt these non-statutory documents as formal planning or other guidance. We will therefore look to draw on the best of this work to create a long-term vision for these areas, emphasising local character and providing a high quality environment for walking, which is formally agreed by the Council.
- 14.16 In order to improve the environment for walking in the borough, Camden is committed to the 'Legible London' concept which aims to improve how easily pedestrians can understand the layout of the capital and find their way around by introducing clear and consistent signage and maps. The programme has begun in Covent Garden and Bloomsbury, and future schemes are anticipated around the borough. Camden has also established a 'Place Shaping Board' to consider the most appropriate ways to shape the services, facilities, infrastructure and public realm to meet the needs of current and future populations (see section 4 – *Delivering and Monitoring the Core Strategy*).
- 14.17 Further information on measures being taken by the Council and its partners to improve the quality of our streets and public places is included in CS2 – *Growth areas*, CS8 – *Promoting Camden's centres and shops*, CS11 – *Promoting sustainable and efficient travel*, CS15 – *Protecting and improving our parks and open spaces and encouraging biodiversity*, and CS17 – *Making Camden a safer place*.
- 14.18 High quality landscaping plays an important role in the attractiveness and character of our surroundings. It can improve the setting of buildings, bring trees and other greenery into built-up areas to relieve the hard landscaping and provide shade, and provide habitats for wildlife. The Council will expect development schemes to provide a high standard of landscaping and boundary features, such as walls and fences. We will encourage appropriate use of landscaping in the form of 'green roofs', 'brown roofs' and 'green walls' which have a number of environmental benefits (e.g. in providing wildlife habitats, in helping to cool and insulate buildings and in retaining water, helping to

reduce flooding), as well as being visually attractive. More detail on our approach to landscaping is set out in the Council's Camden Planning Guidance supplementary document and policy DP22 in Camden Development Policies.

Access

- 14.19 Good access benefits everyone. However, many people are disadvantaged by poor access to facilities and vulnerable and disadvantaged groups, such as the elderly and disabled people, can be particularly affected. Poor access can be caused by difficulties in reaching facilities or by difficulties in using the facilities themselves. The Council requires new buildings and spaces to be inclusive and accessible to all. As accessibility is influenced by perceptions as well as physical factors, buildings should also be designed to appear, as well as be, fully accessible. The Council will require Design and Access Statements for developments to show how the principles of inclusive design, ensuring access for all, have been integrated into the proposed development, and how inclusion will be maintained and managed.
- 14.20 Making roads and pavements and the spaces between buildings fully accessible is as important as making the buildings themselves accessible. The Council will seek improvements for all pedestrians to ensure good quality access and circulation arrangements, including improvement to existing routes and footways. The Camden Streetscape Design Manual and our Camden Planning Guidance supplementary document provide more detailed guidance on this issue.

Views

- 14.21 A number of London's most famous and valued views originate in, or extend into, Camden. These are:
- views of St Paul's Cathedral from Kenwood, Parliament Hill and Primrose Hill;
 - views of the Palace of Westminster from Primrose and Parliament Hills; and
 - background views of St Paul's from Greenwich and Blackheath.
- 14.22 The Council will protect these views in accordance with London-wide policy and will resist proposals that would harm them. Where existing buildings that affect a view are redeveloped it is expected that any replacement building will be of a height that does not harm the view. The current framework for protecting these views is set by the London Plan (policies 4B.16 – 4B.18) and the Mayor's London View Management Framework supplementary planning guidance.
- 14.23 The Council will also consider the impact of a scheme, in terms of the townscape, landscape and skyline, on the whole extent of a view ('panorama'), not just the area in the view corridor. Developments should not detract from the panorama as a whole and should fit in with the prevailing pattern of buildings and spaces. They should seek to avoid buildings that tightly define the edges of the viewing corridors and not create a crowding effect around the landmark.
- 14.24 The Council will also seek to protect locally important views that contribute to the interest and character of the borough. These may include:
- views of and from large public parks and open spaces, such as Hampstead Heath, Kenwood Estate, Primrose Hill and Regent's Park, including panoramic views, as well as views of London Squares and historic parks and gardens;
 - views relating to Regent's Canal;
 - views into and from conservation areas; and
 - views of listed and landmark buildings and monuments and statutes (for example, Centrepont, St Stephen's, Rosslyn Hill and St George's, Bloomsbury).
- 14.25 We will seek to ensure that development is compatible with such views in terms of setting, scale and massing and will resist proposals that we consider would cause harm to them. Development will not generally be acceptable if it obstructs important views or skylines, appears too close or too high in relation to a landmark or impairs outlines that form part of the view. Further guidance on important local views is set out in our supplementary planning documents, for example in individual conservation area statements, appraisals and management strategies and the Planning Framework for the Tottenham Court Road Station and St Giles High Street Area.

Camden's character

Camden is characterised by a great richness and variety in its built and natural environment, with a valuable heritage of local, national and international significance. The following section describes the places, buildings and features that give Camden its distinctive character.

The southern part of the borough is where most of Camden's future growth will take place. It forms part of Central London and has a richly varied and dense character. The planned Georgian streets and squares (e.g. Bedford, Russell, Fitzroy) of Bloomsbury are evidence of the early expansion of London in a form that was architecturally groundbreaking. Modest mews developments to the rear of the terraces contrast in scale and are a particularly characteristic type here and elsewhere in the borough. Regents Park and Nash's 1820s residential development sit at the south western boundary of the borough, contrasting with the earlier Georgian developments in the area.

King's Cross and Euston are parts of the borough that are expected to experience the most change and development over the next fifteen years. Railways have had a significant impact on the appearance of the borough from the 19th century to the present day. These brought monumental architecture and inward migration to the borough and their viaducts, cuttings, tunnels and buildings still affect the shape of development in many parts of Camden, in particular to the north of Euston Road. King's Cross was the largest station in England when it opened and is the earliest great London terminus still intact in its original form. St Pancras (by George Gilbert Scott), now the new London terminus for Eurostar, can claim to be Britain's most impressive station in terms of both architecture and engineering and the station's dramatic roof line forms an important local landmark. Euston station, its ancillary accommodation and railway lines have a major impact on the nature of its surroundings and its future redevelopment will create opportunities to improve the local environment and links between neighbouring areas.

The Inns of Court were some of the earliest establishments in the southern part of the borough. The historic buildings, courtyards and squares of Lincoln's Inn and Gray's Inn give a distinctive atmosphere to this part of Camden, and create oases away from surrounding busy roads. Camden's Central London area also contains Seven Dials with its unusual star-shaped street layout and sundial pillar and the brick, semi-industrial buildings and intimate spaces of Hatton Garden, which were developed in the 19th century to house the workshops and offices of the jewellery trade. The area remains an internationally significant jewellery quarter.

Camden is home to a large number of further education establishments and most are located in the southern part of the borough, including the University of London, London School of Tropical Medicine, Central St Martin's College of Art and Design and the Royal Academy of Dramatic Art. These play a significant role in shaping the character and appearance of this part of the borough. The south of the borough also houses a number of nationally important hospitals and medical research institutions, including Great Ormond Street Hospital, the National Hospital for Neurology and Neurosurgery and the Wellcome Trust.

The town centres of Camden Town, Kentish Town and Kilburn High Road are key elements in **the central part of the borough**. These centres developed in a piecemeal fashion along historic routes into London. They are now marked by continuous, close grained development with commercial units at ground floor level on either side of the road, with terraced housing of a similar density on the streets to the east and west, and little open space. Buildings types are generally consistent in appearance, and public houses are frequent landmarks, which echo the original inns and travellers rests along the historic routes. There is a narrow range of scale and height, and dwellings usually have small gardens to front and rear. Camden Town is strongly characterised by its markets and entertainment. These create a strong draw for tourists and influence the style and appearance of development, which is in many cases colourful and individual.

The areas between these major roads and town centres are characterised by speculative, residential development from the mid to late 19th century for the then new middle classes. These show a variety of distinctive architectural forms and scales, with detached and semi-detached houses in classical Italianate form in Belsize and an eclectic variety of styles including neo-Gothic, Queen Anne, Domestic Revival, Arts & Crafts in Fitzjohns/Netherhall, Redington/Frognaal and South Hampstead/Swiss Cottage. Gospel Oak, West Hampstead and the southern parts of Dartmouth Park were developed to a higher density with terraced houses, smaller gardens and have a more urban feel than Camden's other residential areas.

Social housing schemes are also an important element in the borough's built environment. St Andrews House on Saffron Hill is the oldest surviving public housing block in London whilst early 20th century examples include the London County Council's Bourne Estate on Leather Lane. The LLC's Ossulston Estate is considered the most important inner-city estate of the inter-war period. Post-war examples illustrate an architecturally ambitious programme of housing schemes by Camden Council following its creation in 1965, many of which are listed. The characteristic form was a megastructure of stepped terraces. This low rise, high density approach reflected traditional terraced housing, but provided light, privacy and private open space for all levels of accommodation. Examples are Brunswick Centre, and the estates of Fleet Road, Alexandra Road, Maiden Lane and Highgate New Town.

The Regent's Canal runs through the centre of the borough. Although it is often hidden from surrounding areas, it provides an area of nature conservation interest and amenity space along its course through King's Cross and Camden Town to Regent's Park.

The northern part of the borough benefits from the presence of the large open space of Hampstead Heath, which provides amenity and leisure space, a verdant setting to the surrounding development and famous views across London. Hampstead and Highgate are derived from medieval hamlets and have clearly defined village centres which reflect their origins. They have a variety of building types from cottages and terraces to detached houses and grand residences, with a generally densely packed, high quality urban grain of a range of styles, scales and ages. Both areas contain many high quality, architect-designed houses from the 19th and 20th centuries, many of which have become important parts of the local heritage and are listed for their national significance.
