2015/6455/P	James Sebastian	77 Cholmley Gardens NW6 1UL	15/12/2015 11:37:51	OBJ	<p>I object to this redevelopment - the local area infrastructure is already insufficient, as it can be seen in the local traffic &amp; local servicing pressures -this development would only serve to worsen the problem. As a local resident in this area, I am in full support of change and development but this project in an already congested area does not prove to serve as a productive progression</p> <p>Please contact me if you require any further info/input.</p>
2015/6455/P	paul herman	flat 3 22 lymington road london nw6 1hy	14/12/2015 21:02:39	OBJ	<p>i strongly object to the effect this is going to have on the local amenities. I also strongly object to the height of the proposed buildings. They would sit at the end of our garden and have a huge impact on us. Our flat, 22 Leamington Road is probably effected more than any. The largest of the proposed buildings would be facing us, over looking us and totally overshadowing our view and light. It will ruin our summers and light all year round. It will be opposite our balcony and sitting room. I am devastated by the proposal</p>
2015/6455/P	Geoff Gelbart	99 Priory Road	15/12/2015 14:30:47	OBJEMPER	<p>I strongly object to the proposed development. It is far too big, destroying the charm of our neighbourhood and too many flats for our crowded streets.</p>
2015/6455/P	Eleanor Trunkfield	Ground Floor Flat 77 Canfield Gardens London NW6 3EA	15/12/2015 16:26:30	OBJ	<p>I object to this development.</p> <p>I support the need to create more housing in London, affordable or otherwise. But I don't see how 164 new dwellings can be created with no extra infrastructure put in place to support the large extra number of people who will live there - where will those people receive healthcare? Where will their children go to school? Where will the children play? Where will the individuals park when they receive their residents' permits that undoubtedly Camden will grant them? Where will the residents walk to access the buildings (West End Lane pavements are dangerously crowded as it is)? How will they travel to work (the traffic often comes to a standstill and the train and tube stations are already dangerously full)?</p> <p>Camden owes a duty to its existing and future residents to look out for their best interests as a whole. Unless the social and environmental impact of this development is considered fully, this proposal does not seem sensible. Ultimately it would be to the detriment of West Hampstead and so the borough of Camden.</p>
