Susan,

Please see attached plan showing the alignment of Network Rail's Belsize Tunnels. This plan is based on OS tiles but is believed to be a reasonably accurate indication. The yellow lines represent the internal faces of the tunnels. The bore immediately below Nutley Terrace carries the Midland Mainline Tracks (Network Rail Structure No.SPC1/T/30), the Thameslink Tracks are in the later Belsize New Tunnel to the north (Network Rail Structure No.SPC/T/29). Also attached are sketches from Network Rail's structures files showing cross and longitudinal sections which, while not necessarily to scale – being scans of photocopies of prints from original drawings – give an indication of the cover to the tunnels (probably somewhere of the order of 22 – 23 metres in the vicinity of your works).

Arrangements to view or obtain copies of any available record drawings of the tunnels, including line and level surveys if any exist, can be made with Network Rail (NRG), National Records Centre, Audax Road, Clifton Moor, York, YO30 4GS (or e-mail to NRGYorkCivils@networkrail.co.uk), giving the structure references above. A copy of this e-mail should be included with any request. Search and reprographic fees may be charged.

No works are to encroach within an annular distance of 10.0m from the extrados (BH1 is definitely within this limit) without Network Rail's acceptance of detailed proposals, or result in vibration exceeding a peak particle velocity of 5mm/sec at the surface of the structure.

Please confirm details of the proposed boreholes and the reason they are required so that I can consult the Tunnel Asset Steward.

I should be obliged if you would also recommend to the client requiring these works (i.e. presumably the owner of the property) that proposals for any works need to be discussed with this office.

Hi Lawrence,

Could you please see below and attached

From memory, I think Belsize is on LNE's patch – if not, could you redirect and copy Alasdair and myself in on the corre to say it's being progressed

Thanks

Mike

Mike
 Can you direct to the appropriate person ...

Hope it doesn't take too long for webservices to put the new map on the NR website.

regards

Re: 6 Nutley Terrace, London NW3 5BX
Job Ref: J11158
Work Commencing: 3/8/11
Grid Ref: 526659 / 184995

We are commencing borehole work at the above address, within the property boundaries (location plan & BH positions attached). We have noticed that the site is very close to the Thameslink line through the

12/08/2011

Belsize tunnel. We would be grateful if you could send us plans of the exact route of the line in this area, in order for us to ensure that our site works avoid it.

Many thanks
