**Re: Avril Nakouzi
 Flat 14A-15 Wentworth Mansions
 Keats Grove
 London NW3 2RL**

I am writing as Mrs Avril Nakouzi's GP to support her request not to open a pet grooming parlour in the shop space below her flat. She lives with her son Myles who has severe and brittle asthma. He has had life-threatening exacerbations which have come on very quickly and needed adrenaline from the emergency services. He is known to have a strong allergic element to his asthma and rhinitis. Mrs Nakouzi is understandably concerned that her son's inevitable exposure to the animal dander generated by this business will exacerbate his allergies, causing worsening of his asthma and rhinitis in general, and also put him at risk of another possible life-threatening acute asthma flare.

My colleagues have previously written to support her son in this situation. I am writing to ask you to review things. I think Myles' health needs to be taken very seriously.

Many thanks for your consideration.

Yours sincerely

Dr [REDACTED] MRCGP
