2015/4578/P	Fiona Cubbin	14 A Ainsworth Way London	06/01/2016 11:13:06	OBJ	<p>We object to this application on two grounds.</p> <p>Firstly the application shows old drawings with very unclear information about the details of the external pipe work at the rear of A block on Rowley Way. What is shown is over marked old drawings of the elevation of the block. This is unacceptable as it is not clear what is being proposed. We object because the proposal will drastically alter a prominent elevation of this listed building, altering the rhythm of the facade. There is no explanation of why the proposals are felt necessary or needed, or indeed why the existing service routes or why alternative less obtrusive options are not considered.</p> <p>The second objection we have is to the introduction of secondary plant rooms on Ainsworth Way. We are concerned about plant noise emanating into the properties above. There is no information included about this as far as we could see in the documentation.</p>
