6 Bloomsbury Square Cleaning Brickwork on Front Facade

6 Bloomsbury Square Cleaning Brickwork on Front Facade

Description of works:

Hand cleaning of existing front façade of 6 Bloomsbury Square

Stage 1:

Scaffold will be erected in front facade for the entire height of the building. (See picture of building bellow) Scaffold will be covered in monoflex sheeting preventing any debris or water to go on to road or walk way.

Stage 2:

The cleaning of brick will start once scaffold has been completed. Starting from top down.

Cleaning will consist off manual cleaning only as below:

Using warm water only and wire brush (see picture)

For smaller gaps various size brushes will be used (see picture)

The overall process will take around 25 working days.

Stage 3:

Once cleaning with wire brush has been completed a once over wash will be completed using water and large sponge.

Once completed the building will look like sample that has been done as picture bellow:
