

Planning application ref 2015/6385/P
Address 43 Burghley Road
London NW5 1UH

My address
41 Burghley Road
Kentish Town
London NW5 1UH

Ref the above

We completed an official objection to the above application last night . We have received confirmation that you received our objection

I wanted to add that one of our main concerns about the proposed works is the fact that we have suffered severe subsidence historically in our road due to the soil type we believe the evacuation is a real threat of damage to our foundations and party walls Also there will be parking problems in an already busy street , massive noise pollution , dust contamination, and will alter the look of the facade so its not in keeping with the street

Etc etc

Please confirm receipt of this email

Linda Benson

Hi

We also have a history of significant subsidence in our street due to soil type Regards Linda Benson
