Your comments

1. The building proposed is a huge monolithic structure completely out of keeping with the conservation area it abuts & towers over. It has been dubbed HMP West Hampstead & that seems a fitting name. It would be a very negative addition to the "village" which we enjoy & which is already due to be greatly impacted by other recent large-scale developments.
 2. It is too high & will destroy views from the conservation area.
 3. It is too dense - 600-800 residents.
- contd . .

Please continue on extra sheets if you wish

4. That stretch of West End Lane is already dangerous (fatalities) & to add a new road feeding in would increase that danger, especially with the lack of visibility at the junction.

5. The pedestrian traffic between the 3 stations on the narrow pavements is already excessive and 600-800 new residents would make that problem even worse.

6. Parking in the area is already full up & this development would bring more cars.

7. Travis Perkins is an important local resource for building supplies, both to the Trade & to DIY-ers, as well as being a significant employer, & it should be retained in any such scheme.

8. There is insufficient provision for low-income tenants.
