Re: 101A Messina Avenue, London NW6 4LG.

Further to our onsite visit and survey works. We confirm that we have achieved accurate levels establishing the road level both up and down from the 101A Messina Avenue.

We have also achieved successful readings of the parapet and the house generally.

We also confirm from our data and drawings co-ordinated from YOOP Architects that the level of the proposed extension cannot be seen from the street level, either up or down from the property at any point or position on the public realm.

We attest to the accuracy and reliability of the data and conclusion. Please do not hesitate to contact me with any further information on methodology and experience in these matters.

Best Regards

Adam Urlewicz
