Informatives:

- 1 Reasons for granting permission.

The proposed conservatory extension would be built using a polyester powder coated aluminium frame with a hipped roof style. The aluminium structure would be powder coated wood sage (Ral 7032). The extension, measuring 3.5m wide, 3.4m long and 3.3m high (2.3m to eaves level), would be subordinate in scale and its design would sit comfortably with the host building preserving the character of the original building. The proposed glazed conservatory would not be visible in views from the public realm and private views of it would be limited. Given its design, scale and location, the proposed extension would preserve the character and appearance of the host building, street scene and the Hampstead Conservation Area.

Similar due to its size, design and location, it would not significantly harm the amenity of any adjoining residential occupiers in terms of loss of light, outlook, enclosure or privacy.

No objections have been received. The sites planning history and relevant appeal decisions were taken into account when coming to this decision.

Special attention has been paid to the desirability of preserving or enhancing the character or appearance of the conservation area, under s.72 of the Listed Buildings and Conservation Areas Act 1990 as amended by the Enterprise and Regulatory Reform Act (ERR) 2013

As such, the proposed development is in general accordance with policies CS5 and CS14 of the London Borough of Camden Local Development Framework Core Strategy, and policies DP24, DP25 and DP26 of the London Borough of Camden Local Development Framework Development Policies. The proposed development also accords with policies 7.4, 7.6 and 7.8 of the London Plan March 2015, consolidated with alterations since 2011; and paragraphs 14, 17, 56 -66 and 126-141 of the National Planning Policy Framework 2012.
