2015/7030/P	Jack Herriot	Flat 9 Cotton house	27/01/2016 22:13:15	COMMNT	We have 3 windows that open out from our flat onto there property. If they are allow d to be flats there Windows should be frosted so they can not look through into our toilet. Noise in the summer will dramatically effect our flat from this development. There building has been noisy for the past few months. They leave lights on whilst building and will do when flat have been constructed that light up the inside of our flat.
2015/7030/P	Ben Day	Flat 2 The Cotton House NW5 1AG NW5 1AG NW5 1AG	27/01/2016 18:07:42	COMMNT	I am concerned about the proposed works and the affects on the living conditions of surrounding dwellings. Whilst the planning permission seeks approval of altering windows on the Front (South Eastern side of the building), no mention is made of the back where works to greatly enlarge the basement windows are already underway. Having contacted your planning office I was advised to take a picture of the work since it was not meant to be undertaken prior to approval from your department. I am especially concerned that this problem has occurred so early on in the works and suggests that the developer has a flagrant disregard for the planning process. I believe the proposed works will detrimental to the quality of life of surrounding residents, who have already been affected by said works. I believe that the access road to 79 Fortess Rd inadequate to support the increased traffic flow that the intended building changes will bring. Also, the build up of rubbish in the northern alley of the building is of particular concern as I believe it poses a fire risk and since the gate that provides access is not fitted with an FB key any event of fire could be a serious endangerment. Furthermore I am concerned that the works proposed pose a real threat to the traffic flow and noise levels in our neighbourhood; in which they have already grown to threatening levels. I feel that the planning permission being sought is inconsiderate and has already been contravened. I am alarmed by the situation and hope to receive some assurance that my fears are unfounded.
