2015/6278/P	David Immanuel	13 Lyndhurst Terrace London NW3 5QA	31/01/2016 17:03:04	OBJ	<p>Further to my first email I have now become aware how much more extensive the proposed development is, than I had previously realised.</p> <p>The massive basement is certain to create serious water & environmental problems for us, as neighbours at number 13. There are springs at Mountview (no: 11) & at 19 Thurlow Rd which have caused extensive water damage-it is no coincidence that the the path behind our property is called "Spring Path"after the nearby springs.</p> <p>The proposed roof terrace will dominate our garden, & I object strongly to this.</p> <p>I object to the demolition of a house of sympathetic bulk & proportion in the conservation area for one which is inferior-simply too big for its plot, allowing no garden & making a roof terrace necessary.</p> <p>The motivation- to create an internal space of five times the existing size -will create significant problems for us as neighbours & a very negative impact on the environment & the conservation area.</p>
