## Heritage Grilles

Home > Heritage Grilles > Heritage Vent Grilles

### Additional Information

The Heritage grille is our most popular product, not just in the UK, where it is made, but also in the USA where we send an ever increasing number of orders each week.

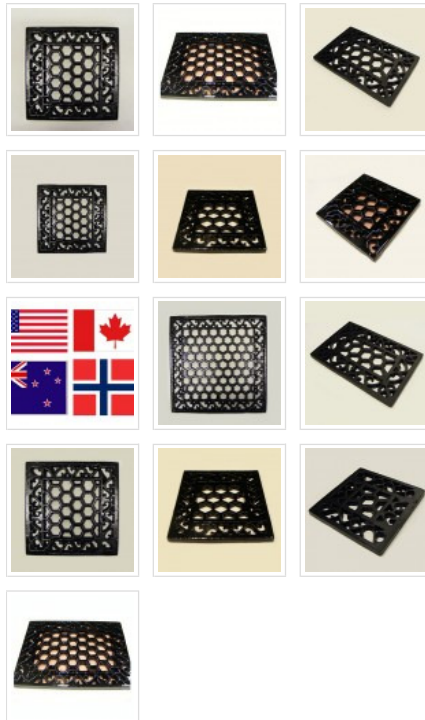

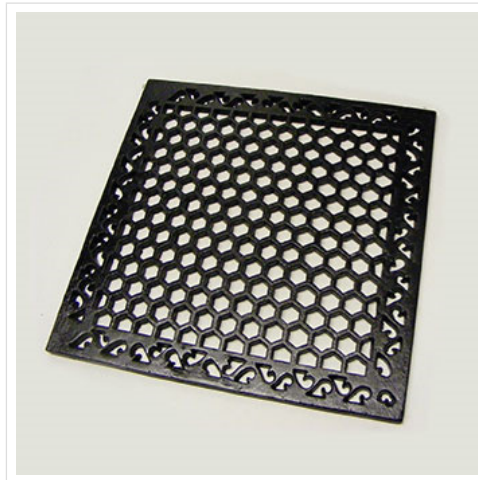

They're cast from recycled iron, each and every one is made by hand and cast using the traditional green sand method. Look carefully and you will discover no two designs are exactly the same - they're all similar of course, but each one is unique and each one hand finished and painted in our workshop in Devon.

Fitted to any outside wall or into the plasterwork in the finest room, the Heritage grille is sure to work in harmony with the building, be it Medieval, Georgian, Victorian or Edwardian.
