3 SIGN SPECIFICATION

Internally illuminated projection sign. Face panel to be constructed from aluminium with raised pushed through ampersand. Inner rim of sign and bracket constructed from mild steel powder coated cream. Bracket sleeve folded from single aluminium sheet powder coated cream. The projecting sign can be fascia or wall mounted on the left or right and should be positioned where most visible or above the ATM. Fascia mounted is the preference. If it is not possible to fascia mount the projecting sign then it should be wall mounted in a suitable location above.
