2015/7220/P	c.haudot	flat 38 Knollys House Tavistock Place london WC1H 9SA	16/02/2016 12:36:51 INT		I am extremely concerned, as i live at Knollys House directly opposite Generator sharing Compton Place, which in fact generator "guests" use as their own, I object strongly to the proposals for health and safety reasons because we are so close, I live on top floor, and also especially having heard that Camden Council has refused to have the mast on their own office roof,(therefore if it is not good for Camden council, it is not good for us residents at Knollys), 2 - blocking our light and being unsightly as we have little already (having looked at the plans), 3 - interference with TV, telephone lines, broadband etc.. but the worse is health and safety as i am very worried about r radiation. Because of Generator, our little area which comprises Knollys House, Generator and all the newly built block for 2000 new students in Cartright Gardens has become more and more condensed. I also question why should a mast be erected in Central London? the area is saturated with all the technology especially as google will be in Kings Cross. Our quality of life matters. The area, especially our area is saturated with students who only stay for a short time and Vodafone )(and Generator) only want to provide for a very transient population. I also question why Generator want the mast on their building, Money is obviously involved. We have been imposed already by having Generator and have to endured them, and Camden has done nothing to stop the increased number of people staying there.
2015/7220/P	Emma Rickett	Flat 21 39 Tavistock Place Bloomsbury London WC1H9SA	16/02/2016 13:44:40 AMEND		Before planning permission is given for this development the Knollys House residents association would like some color around the cancer threat and a final appearance of the Generator building.
2015/7220/P	Thierry	26 Knollys House Tavistock Place London WC1H9SA	16/02/2016 23:05:41 COMMNT		Hi. I object to this planning due to potential health risks including cancer.

2015/7220/P	Luke Andrews	Flat 39 Knollys House 39 Tavistock Place London WC1H 9SA	16/02/2016 13:57:41	OBJ	<p>The site of the proposed development overlooks my flat and will adversely affect my view. The increased roof height is directly in the line of sight from my window.</p> <p>This is not a suitable development for a conservation area. Buildings in a conservation area should not have an additional use as phone masts.</p> <p>The harmful effects of phone mast radiation are not well understood and so the development may pose a risk to health.</p> <p>The address on the application is incorrect which might have lead potential objectors to overlook it. Can this be rectified and the deadline extended? The correct address is MacNaughton House, Compton Place.</p>
2015/7220/P	Kate vial	Flat 25 knollys house 38 Tavistock place	16/02/2016 19:52:21	COMMNT	THIS IS RUINING OUR CONSERVATION AREA !!!!! They have been refused elsewhere , why now in Bloomsbury? They are an eyesore in one of the most beautiful areas in London. these antennae come with cancer risk too !
