Subject: 29 Kings Mews Planning Application Comments (20155080/P)

Sent: Thu 19/11/2015 17:49

Dear Rob

Following our telephone conversation earlier today, I am formally objecting to the aforementioned proposal.

Whilst daylight and sunlight information was provided during the original planning application (2012/3877/P) it has been omitted from the current one.

As an owner of a neighbouring building, it is imperative that I am able to see the impact the proposed development has on light.

I therefore kindly request that updated daylight and sunlight information is insisted upon, which takes into account the increase in height of the development. This will then allow the owners of neighbouring properties to assess whether the lighting to the existing buildings will be adversely affected by the development.

Regards

Michael Petsas
