32 Kennistoun House

Leighton Road

London

NW5 2UT

I support the proposed lift which will be installed in Kennistoun House. Please see outlined reasons why I support it.

It will help the majority residents who live in the estate.

Older residents (who struggle to walk up the stairs)

House bound residents (who cannot use the stairs without being carried down)

Residents who have ill health (who are struggling to use the stairs)

Families (with shopping and buggies)

Friends, relatives of residents (to allow them to visit residents now due to lift being installed)

The good design of the lift shaft which will be in keeping with the elegant look of Kennistoun House and not disturb the look and feel of the court yard.

I believe what creates good and happy estates are good architecture and residents who make efforts to feel part of the community.

Antisocial behaviour I believe will not be caused by installing a lift as the majority of residents know each other very well.

The lift will be a welcome and overdue asset to residents
