Comment: OBJ
Response: This planning application differs significantly from the original application, 2015/1449/P, which was granted in April 2015 and which followed the Camden Planning Guidance document (CPG 1) and to which I had no objection. The layout of this new application deviates significantly from the guidelines. Figure 7 on page 40, section 5.26 shows quite clearly how such a balcony should be constructed. I am also aware that there have been several planning applications that were rejected for these reasons and I don't see any reason for this application to be granted. Additionally, if granted, my privacy will be compromised, something which is also covered in the guidelines in section 5.23.
