2016/0410/P	Phillip Cornwall	Apartment 5-26 St Pancras Chambers Euston Road London NW1 2AR	25/02/2016 13:20:10	COMMEMP ER	I live on the 5th floor of St Pancras Chambers overlooking the development. The approved roof top extension already has a significant visual impact on the view from St Pancras Chambers. I believe that the proposed lift overrun will further adversely impact the visual impact by adding additional height to the building as well as appearing as an afterthought to the design. Whilst I appreciate that the design requirements have changed, even some basic research shows that there are lift options that would suit a building of this size without the need to add height to the building. I do not see any evidence that such solutions have been considered. In summary I object to this application as it adds significant height to the building and adversely impacts its appearance from an overlooking building.
