Comment:
Response: I am against the roof terrace being built on this property as my garden and property will be completely overlooked. A roof terrace will mean potential parties and inevitably a lot of noise which will affect multiple properties in this area. The dormer extension and roof terrace will take months to complete and create a lot of disruption for neighbours with noise whilst it is being constructed. With property in such close proximity any noise from this development during being built and after, once being used as outdoor space will be an issue.
