Dear Matthias

Please find attached the updated drawings to indicate the Roller Shutter and housing.

I have included a proposed and existing section and updated the planning portal to show 600 cd/m illumination level for Section 11, I have also indicated that on the projecting light section drawing. The fascia lettering is the same.

I have drawn a new section through the projecting sign lighting as requested and added a note to the drawing regarding how they should light the fascia lettering. These are just acrylic and metal letters and they have been fitted on other Abokado outlets all over London, if you need a reference.

I hope that this is enough information for you now.

If you do have any queries please contact me and I will do my best to address them.

However as I work indirectly through Abokado it will take time to get any answers to questions from their Designers and Engineers.

Kind Regards

Roy Gladwell
