2015/7158/L	Malcolm Brinkworth	33 Percy St W1T 2DF	03/03/2016 09:56:38	OBJ	<p>Brinkworth Films Ltd of 33 Percy St strongly objects to the building plans of No.32 Percy St. We are in the lower ground and the extension will have a significant effect on the natural light that comes into the back of our office. We only have two exterior windows and the one at the rear – which is a conservatory style roof light - is vital to us. Any diminution of that light will make a massive impact on us.</p> <p>We are also concerned about a potential loss of privacy. We are unclear from the planning description as to whether this will mean that we will be overlooked. If so, that again will have a significant and deleterious impact on us.</p> <p>Finally, the test works carried on the basement of No.32 in December 2015 made it intolerable to have any kind of conversation amongst ourselves. The noise was quite extraordinary. The proposed extension and basement evacuation will cause a lot of nuisance and disturbance to our operational day for several months and have severe consequences to running our business efficiently. Most of our business is creative and there is a great deal of work by phone. It will be almost impossible to work here with drilling and other noise going on in the background.</p> <p>We would appreciate you taking our concerns on board.</p> <p>We would request that the planning application be denied in its current form.</p>
