

NW/n D/2

Automatic opening window on thermal & rain sensors to face of "chimney" & dormer over stair for ventilation of the whole house. The tapered roof form accelerates warm rising air & aids in stack ventilation. This is especially important for the deep plan rooms without external aspect along the back edge of the site at ground & basement floor.

- ridge level 12750

Note: The site datum has been re-indexed (0.00 has been lowered by 120 mm).

Wrap-around flat roof for window cleaning & maintenance along lengthy & inaccessible boundary with 14 Parliament Hill.

Fixed glass rooflight/window over stair. Overhead location & narrow profile prevent overlooking or loss of privacy to 14a Parliament Hill
