Air conditioning condenser
14 ROSEBERY AVE

I am a resident above this property and am very concerned about the noise these plants cause when in use. There have been problems in the past with high pitched electrical humming and whining at the back of rosebery square eve night and at weekends so the system would have to be switched off when not in use. The noise echoes off surrounding walls and is amplified disturbing residents whose living areas are at the rear. Please consider this comment.
