2016/0750/P	Stephen Winter	2nd and 3rd Floor Flat 117 Fortess Road London NW5 2HR	15/03/2016 03:59:12	INT	<p>The property at 117 Fortess Road was substantially redeveloped in 1988. I have owned and lived in the 2nd and 3rd floor flat at the property since that date.</p> <p>The 1988 redevelopment entailed replacing the upper section on the property from about midway up the 2nd floor level all the way up to and including the roof. As a result, even after 27 years, there appears to be some differential movement that manifests itself in cracks appearing on the walls and ceilings of my property.</p> <p>My concern with the planning application 2016/0750/P is that the structural works involved, even though not substantial with the regard to the overall size of the property, will cause damage (by way of increased cracks to the walls and ceilings) to my property on the 2nd and 3rd floor levels.</p> <p>I therefore believe that it should be a minimum requirement that records are taken (and tell-tails installed) at my property before any work commences and the basement flat owner undertakes to rectify any damage that results to my property from the proposed works.</p>
2016/0750/P	Margaret Ellis	ground floor flat 117 Fortess Road London NW5 2HR	14/03/2016 14:48:26	COMMNT	<p>Initially I would like to know the height and depth of the proposed extension. I am very concerned that it will cut the light to my ground floor flat.</p> <p>I am also concerned about the noise that this work would generate, and would therefore like to have an estimate of the duration of the works</p>
