Hi Matthias,

I confirm as follows:

- The hanging sign is internally lit. Just to emphasise the sign is aluminium and therefore the illumination will be subtle and very different to illumination of a plastic sign.
- The smaller letters on the fascia (i.e not the stainless steel letters) will not be illuminated and are vinyl self adhesive letters.
- The awning will be 100% polyester (therefore canvas and not shiny PVC).

I hope this clarifies things but if you have any queries, please let me know.

Thanks,

Kind regards,

Catherine
