TO WHOM IT MAY CONCERN

21 KIDDERPORE GARDENS, LONDON, NW3.

Vincent & Rymill have been instructed by Mr. and Mrs. S Gordon to act as Consulting Engineers for the proposed development and will be responsible for the design of the permanent basement and super structure works. Vincent and Rymill will undertake regular site supervision and checking of the works throughout the duration of the project to monitor their implementation.

With respect to temporary works, the appointed contractor will be responsible design and implementation of the temporary works necessary to build the lower ground floor. Vincent & Rymill will inspect and approve designs as required by the condition. Once on site, Vincent and Rymill will monitor the critical elements of temporary lower ground floor construction works throughout the duration of the construction phases to ensure compliance with the design.

Vincent & Rymill are the principle engineers, we have successfully collaborated on the design and implementation of basement development throughout London. We work closely with many basement contractors on a regular daily basis to monitor the permanent and temporary basement construction works.
