2015/7079/P	Amala Shah	22 Belsize Lane London NW3 5AB	15/03/2016 15:49:34	OBJ	<p>I am very much against this massive redevelopment. The impact on the livelihoods of so many musicians working in the adjacent Air Studios-which i understand will not be recording during construction works at 11 Rossllyn Hill-is considerable. If the musicians stand to loose any incomes on account of the closure of the recording studio, it will be a huge problem for them. The second impact will be on the safety of the pedestrians and very young school children crossing at the traffic lights which are at the entrance to this property. The vast amount of heavy vehicular movement in and out of this construction site will be affecting severely, not only the pedestrian and children but also general traffic in the area, resulting in huge traffic chaos through the week days for several months. I also understand that some adjacent properties have flooding from the basements due to movement of the water-table. I am quite sure that digging to such an extent would be most detrimental to the water table of the area.</p> <p>I srongly oppose this redelopment application.</p>
