1 February 2015

Dear Mandip

**192 HAVERSTOCK HILL, LONDON NW3 2AJ**

In relation to the Minor Material Amendment Application to the approved scheme, I enclose a copy of our drawing 11922/09, as an overlay with the new proposal for the MMA 2016 application in red on the 2014 approved scheme in black.

The new MMA application is just shorter and just narrower than the approved scheme. The reason that the basement is narrower is that the site boundary along the shared access has been plotted more accurately and the basement reduced accordingly. The only place where the footprint is outside the 2014 scheme is to the front of the shared access where the basement has been rationalised as a straight line rather than stepped construction.

The depth of the basement is the same.

There is no material change in the size of the basement and previous BIA is applicable to the MMA submission.

Yours sincerely
