2016/0759/P	Jayne Hammond	9 Marsden street Kentish Town London NW5 3HE	17/03/2016 19:02:04	OBJLETTE R	By allowing planning permission,we set to lose another traditional pub,where you can enjoy a nice quiet drink with family and friends and not at over priced prices!!! Dave & Jacky would certainly lose their entertainments license as they have music every Saturday and twice a month on a Friday,some of these bands and entertainers have been playing here for nearly 20 years. They would certainly lose part of their premises to make entrances for the flats above and the pub would lose its charm. Camden is known for variouations of life so let's leave the pub as it is and tell developers to develop else where,because of being a proud Camden resident we need pubs like these to remain,especially when they have trade from all walks of life from friends in the north of England who come to London for the rugby whether it's league or union and they came afar as Germany.
2016/0759/P	Anna Silver	80 St Kildas Rd	17/03/2016 22:52:45	OBJ	This sounds like another example of running a good local pub into the ground as guaranteed that people in flats will find reason to complain about noise. The Carpenters Arms is an asset to the community and should remain as such. There are few places for families like ours to go and share our lives and laughter as well as the sadder moments of life. Even if it can miraculously hang on, we will be denied the right to mingle outside on a balmy summers evening with doors and windows thrown open due to having to limit noise This application is wrong
2016/0759/P	Michael Mescall	4 St. Anns Hse., Margery St. London WC1X 0HS	17/03/2016 17:56:22	COMMNT	I would like the Carpenters Arms to remain as it is. A friendly pub seving the local and wider community with activities such as music concerts, kareoke and numerous darts teams. Such pubs are becoming more and more rare in this area and I do not want to lose this one. Thank you.
