For the attention of Ian Gracie, Planning Officer

Dear Ian, apologies for sending this again if you have already received it — not sure it went through to you earlier:

Dear Angela, Many thanks for copying us in to you email to Ian Gracie. Just two points: 1 The smaller trees you mention are not yuccas, but our Amelanchier and Fuchsia trees on our side of the fence.

2 David has asked me to mention the following: ' Concerning the basement bedroom, patio,etc. in No. 44, there would have to be an excavation of probably about 2m below our garden level. Some form of removable steel shuttering would be required to this depth. It is likely that steel shuttering would be driven into the ground shaking the terrace of 1—3 Canteloves Road and the Mews roadway and adjoining buildings. Victorian buildings are more fragile than the modern Mews buildings. If this shuttering were proposed, we would have to warn the District Surveyor of the potential cracking of these buildings and their drainage connections into the main sewer in St Augustines Road. Would Camden Council be responsible for such a damaging event?'

I will copy Ian Gracie in on this email.

With best wishes, Regards, Sue MacIntyre

c. Ian Gracie
