Your comments on the planning application

We strongly oppose the proposed modification to make this new development even taller and wider. This development is already completely inappropriately huge for the site and out of proportion with all the surrounding houses. The new houses will be two stories higher than all the surrounding houses and overlook our gardens and have a direct view straight into our and our neighbours' kitchens, lounges and bedrooms.

I do not understand why Camden has allowed this development to go ahead especially as a recent application

### Planning Application Details

from some houses in Lower Merton Rise to build one more story on their three story houses was turned down as it would encroach on the privacy and light of the houses on the other side of Elliott Square. This development is taller, wider, closer to our boundary than the request for one more story on existing houses and will completely destroy our privacy. Why is one side of Elliott Square so completely disregarded by your planning system when the other side was protected? We will lose light to our homes.

The building is simply too close to our fence with hardly any outside space and no consideration has been given to our privacy. Our house will be directly looked into from numerous windows from this large development. I believe the rear windows of all the houses in this new development should be required to have frosted glass at the very least to prevent a complete loss of privacy for all the residents at 15, 16, 17, 18, 19 and 20 Elliott Square. Many of us have young children and it is outrageous that the residents in this new development will have direct line of site into their bedrooms.

I am also extremely concerned about additional cars driving from underground parking over a pavement that represents a major thoroughfare for hundreds of young children walking every day to and from the nearby St Paul's Primary School.

I hope you will consider our strong opposition when considering this new application
