

Date: 21 March 2016
Application Reference: 2015/3980/L

Dear Sir/Madam

16 Eton Villas, London, NW3 4SG

In respect of condition 3 of the listed building consent granted on 18 November 2015, I append to this letter detailed drawings of:

- a) Plans at 1:20 (minimum scale) of the window in the side elevation, showing the archway, fenestration pattern and materials;
- b) Plans, sections and elevation drawings at 1:20 (minimum scale) of the reinstated double doors, plus 1:2 details showing door mouldings and surround/architrave details.

As per Informative 1 concerning the door between the hall and front reception room the following has been noted:

"The applicant has provided evidence that the door between the hall and front reception room is no longer in its original position. As such, the relocation of the opening is considered to be acceptable."

We would in fact like to relocate the door to the original position rather than the position noted on the application. As this change is a reinstatement of an original feature (and Camden has been assured of this), we trust that this will be acceptable.

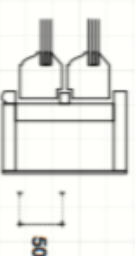

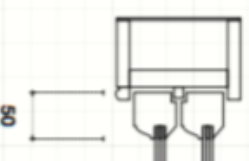

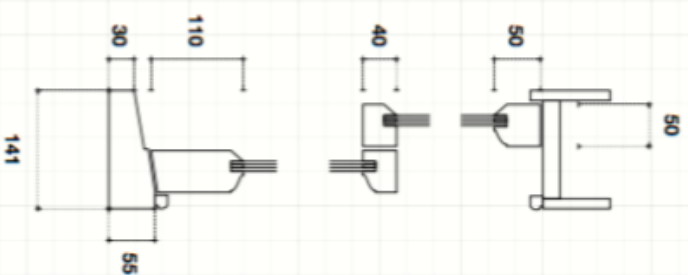

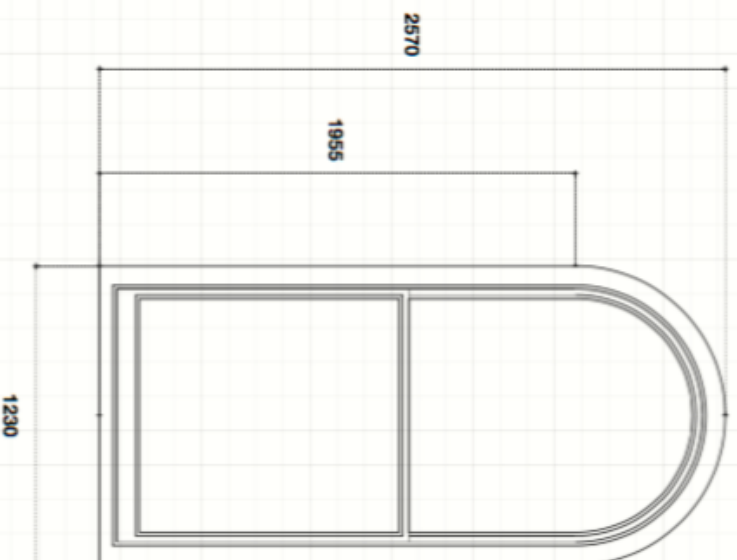

Yours sincerely

Joseph Bekhor

a) Window in side elevation

Joe and Hannah Bekhor

16 Eton Villas
NW3 4SG

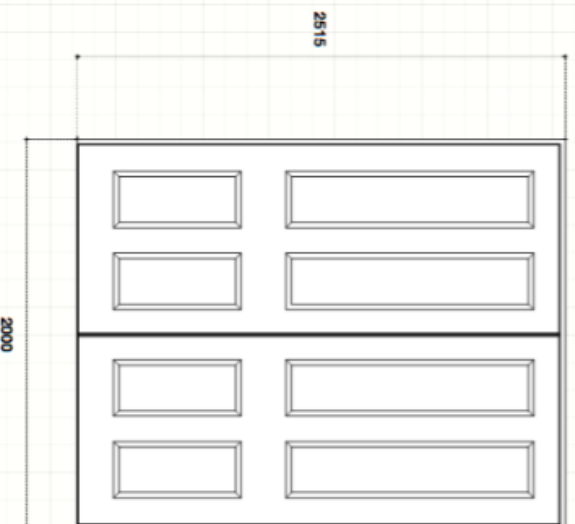

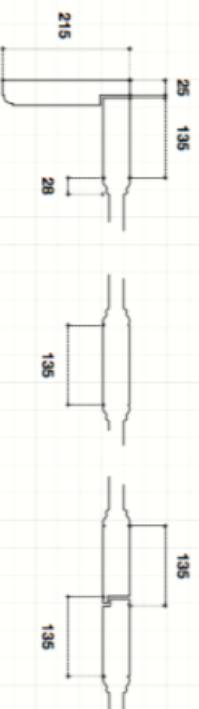

Stairwell Window

Fenestration pattern to be clear/plain glass
4/4/4 Slimlite double glazing (toughened)
