| 2016/0321/P | Catharyne Ward | Flat 13 1 Little Russell St | 25/03/2016 15:17:56 | OBJ | <p>I reside directly opposite no 6 COPTIC ST in a building housing vulnerable, chronically unwell, and elderly residents. I strongly object to this repeat planning application that was previously rejected. The addition of 2 stories to the rear and another story at the front of this building in the sensitive Bloomsbury Conservation Area is wholly inappropriate. If extended upwards, 6 Coptic St. will be detrimental to the surrounding neighbors as we will lose light and privacy. We will also have more environmental hazards to put up with during the extensive works that this proposal will entail. The roof extension is out of character and the current roof is quaint and attractive, adds a beauty and authenticity to the historic street which sadly will be lost if such developments as this are allowed. Please remember that the attempt to add a roof terrace to next door was rejected(2014/1564/P) on grounds that the roofscape should be preserved. The remaining older buildings in Coptic St. are an asset to our heritage. The original roof tops are a part of this heritage & this extension should be strongly denied.</p> |
