**Re: Weston Green Roof / Fitzjohns Avenue**

Dear Chris,

Please find attached our NBS Specification along with a drawing of the proposed green roof system for 92 Fitzjohns Avenue.

The vegetation will be a mix of maximum 25% sedum and a minimum of 75% native wildflower plants (biodiverse).

I have also attached a plant list of the proposed vegetation.

We propose a substrate depth of 100 mm as adequate depth for the plant mix.

As for maintenance, please note attached maintenance guide.

Please let us know if you need any further support.

With kind regards,

  
Stefan Zeller  
Managing Director
