

Barriers and Fencing GT Lightweight Barrier

Eve's GT Lightweight Barrier is a steel temporary barrier system, suitable for low to medium crowd control.

Available in 2.3 metre lengths with steel tube vertical infill bars, rather than mesh, these barriers are suitable for demarcation and ideal for golf courses and field events to control the flow of people and filling crowds. The barriers can be provided with fixed or flat feet and can be configured with gates for vehicle or pedestrian access.

The barriers can be used in specific configurations to create low security sterile zones.

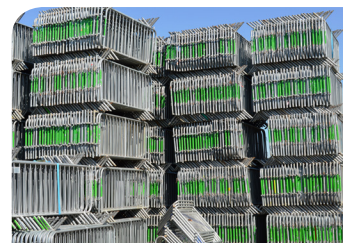

Benefits

- Pedestrian and vehicle gates for access through barriers
- Fixed or flat feet options available

GT Lightweight Barrier:

**Ideal for controlling the
flow of people at events**

Barrier Systems: GT Lightweight Barrier

Technical Information

Weight	12 kg
Height	1,000 mm (excluding feet)
