2016/1454/P	Darian Leader	1 Pilgrim's Lane London NW3 1SJ	04/04/2016 09:03:14	COMMNT	I am concerned about a number of factors with this application. Firstly, creation of a roof terrace will block light to our property, which stands directly behind it, to the South. Raising the height of the existing roof level will deprive my home of much-needed light. Secondly, a new roof terrace will add to the noise level at this and surrounding properties. Thirdly, I am very concerned about the proposed installation of air conditioning units. They are currently no functioning units and adding them will increase noise levels to an unacceptable level. The existing house has been there for years, existing perfectly well, and although a refurb is obviously reasonable and required, making such substantial changes will be detrimental to the surrounding properties for the above reasons.
