2016/1362/P	Edward Laws	31 centre point house london wc2h8lw	11/04/2016 15:08:16	COMMNT	RE "385sqm of drinking establishment" NO NO - stop this madness now Camden Council - you have already gotten into bed with Almacantar and permitted change of use to alcohol use INSIDE centrepoint house - a residential block which is an absolute disgrace where you have fallen very far short of your duties to residents in what is meant to be a protected zone. You have also allowed Almacantar to run ruin in this area with their development whihc has totally ruined peoples live in CentrePoint House - the noise, vibrations, safety issues have been numerous and recurrign and you do nothign to halt the aggressive developers. I do not want ANY alcohol licenses for the building opposite centre point house so no bars, no restaurants servign booze, no outdoor seating - you just draw the wrong crowd to our front door. I would want a full enquiry into the behaviour of Camden council over the last few years in their awarding of planning permissions that have been a huge dis-service to local residents rather than representing our interests. It is a sad reflection on how council's are now servicing the big profiteering of aggressive developers at the expense of residents
