2016/1529/P	mr J Newcomb	flat 6 8 longford street	15/04/2016 10:50:50	OBJ	<p>As a resident of the building that is both adjacent to the service entrance and of the shared communal area which will be overlooked by this proposed build I object to the total lack of consideration for residents. Last summer residents of 8 lonford street were subjected to noise and waste pollution from the works conducted on a building nowhere near us, I dread to think what we would endure from another project on our doorstep, works were conducted at all hours with no consideration and refuse was stored and disposed of in the street with a total lack of respect for pedestrians and residents, at one point I even removed my child from our home due to the levels of dust, the environmental agency gave me a really usefull piece of paper to fill in over a period of time which was pointless and again showed how little consideration is taken into account of residents near commercial buildings.</p> <p>I also object to our communal area entering a state of complete lock down on all sides by yet another obstruction to light and most likely another platform for spectators to watch our already over exposed space.</p>
